Carried
Coun. Murray, that meeting adjourn till Friday, July 24th. Cd.
B. H. Green, Sec-Treas.

NOTICE
A Bay Mare, black stocking legs, white strip down face, branded right shoulder—K with bar below, is impounded by H. E. Jeffery, Poundkeeper, R. R. 4 Edmonton.
The owner of this animal should immediately get into communication with the above named Poundkeeper.
B. H. Green, Sec-Treas.

TENDERS
Tenders will be received at the office of the Secretary Treasurer Village of Irma not later than 5 P.M. Thursday, July 16th, 1931 for the hauling and spreading of 100 or more yards of Gravel for the streets of the Village.
Further particulars can be had by applying to the undersigned.
Chas. Wilbraham, Sec-Treas.
Village of Irma.

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES
The services next Sunday, July 12th will be at Albert, Alma Mater, and Irma at the usual hours. The topic of the sermon will be "Three Great Issues that Challenge the Christian Conscience".

The W. M. S. is planning to have a special session at Albert next Thursday, July 16th. Miss Matthews has invited the society to meet at her home. The special feature will be an address by Mrs. Reeves on Palestine. She has been a missionary nurse there for a number of years and has many unusual experiences to tell. None of the ladies should miss this. The cars will leave the church and those wishing to go are asked to meet at the church by 2 p.m.

Dr. Toyohiko Kagawa in his analysis of Russian Communism says: It is against Democracy; it is against freedom of thought; it is against the independence of the minority; it is against free discussion—against parliamentarianism. The only way to reconstruct society is the love of Christ expressed in all social activities. Christianity is a social unit movement on the basis of love. "We must actualize and realize the Gospel in industrial and commercial life."

ANGELICAN CHURCH
There will be a service at the United Church at 3 p.m.
Rev. A. M. Trendel, Vicar

Please notice that the regular meeting of the W. M. S. has been changed from the church to the home of Miss Matthews in the Albert district on Thursday, July 16th.
Everybody welcome.

**IRMA SCHOOL FAIR
THURS. SEPT. 10th**
The Irma School Fair will be held at Irma Sept. 10th Thursday, 1931. It is hoped by the Fair Board that all scholars will read this bulletin carefully and follow the rules for that is how the exhibits will be judged.
The gardens have been badly damaged by frost and cut worms, but we all suffer equally, so enter the best you have for it is the exhibits which makes a fair a success. We will get prize lists' out soon. Entry tags and stickers can be had by teachers by seeing the Secretary.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

KINSSELLA NEWS

Plans are already under way for Kinsella's Annual Sports Day to be held at the 'Late Hattie' sports grounds on July 23rd.

At a recent meeting of sports enthusiasts held in Kinsella the programme for this year's event was carefully gone over, and from all appearances it will surpass last year's programme, which was considered very good and was carried out in every detail.

A clown has been engaged and is coming down from Edmonton to amuse young and old during the day. Everyone is asked to assist in every way to make this day a success.

Word has been received from Johann Overbo, B. A. who is stationed at Frog Lake having charge of the missionary field there. His many friends will be glad to hear that he is getting along fine and furthering the good work. Johann although he has only been at his new post a short time, has already established several Sunday Schools in his district; and all those acquainted with him, will know that he will be doing splendid work.

The many friends of Mr. and Mrs. Horner of Ontario will be glad to meet these old timers once again. Mr. and Mrs. Horner were among the early pioneers of this district. They are spending a few days here and in Edmonton before returning to Ontario.

Again heavy rains have visited this district during the past couple of days, and while moisture was not urgently needed it was welcome and will keep the ground in good condition for the breaking of new land. Much of the early wheat is now in head and the outlook for a real good crop is bright.

On account of the wet season considerable new land is being broken, which will increase the acreage for next year.

The Misses Alice and Diamond Overbo are spending their vacation at the home of Mr. and Mrs. Hermann Overbo.

While driving home from a dance recently, Mrs. C. Grosland had the unfortunate experience of having her buggy run over by some unknown car going the same direction and without lights. Mrs. Grosland was thrown out of the buggy and one of the car wheels ran over her ankle, causing her a very painful injury. The driver of the car, who understood escaped injury but his car was badly damaged, and unable to run under its own power. The buggy was at last smashed up. Mrs. Grosland is slowly getting over her painful experience, though unable to have much use of her leg.

A considerable amount of fence are being erected, in fact more than usual, this summer, on account of the ease with which post holes can be made owing to the very wet season.

The last wet spell which has been going nearly steady for the past four days brought down too much moisture to suit one local, energetic agrarian. The farmer in question was taking advantage of the soft ground and was busy all day yesterday making post holes with his crow bar. He had just one little slough to go through with his line of posts, before he would call it a day; and when in the act of pushing a last hole, his bar went right out of sight. The farmer made a few futile attempts to locate the bar but was unsuccessful, and has decided that the ground is getting too wet for fencing, an occurrence, that as far as can be remembered by the oldest of old timers, has never been known before.

The rains of the past few days have put the roads in a bad condition. All the ungravelled grades are practically impassable and the country trails are overflowing with water in many places. Crops are benefitting and are showing splendid growth.

JARROW NEWS

Mr. Grant Saul returned from Calgary last Friday.

Tuesday a very enjoyable evening was spent in the Jarrow Community Hall when a shower was given to Mr. and Mrs. Ed. Hogg. Games and other amusements filled the pole for the evening and at 11.30 Miss Margaret Taylor dressed as a bride entered the hall to the strains of music played by Miss Avis Christenson, wearing before her carriage very prettily decorated and filled with gifts, which she presented to the bride and groom. A dainty lunch was served afterwards and everyone enjoyed themselves.

Mr. Fred Rowland, formerly of Jarrow, and who has spent the past three months at his home in Devil's, motored to Jarrow on Sunday and is spending a week or so visiting friends.

Mrs. O. R. Marby and daughter Neda left on Wednesday for Melville, Sask, where they are planning on spending part of their vacation.

Miss Edna Peet also left Wednesday for Edmonton where she is planning on taking in the Exhibition and visiting with her many friends while there.

Mrs. W. Jamieson, a patient at the Viking Hospital is making a speedy recovery after her operation, but will not be able to return to her home for several weeks.

Mr. and Mrs. Grant Saul and family left for Chauvin last week where they will spend their vacation.

The Jarrow Sunday School held their annual picnic at Hardy's Lake last Friday. All report having a good time.

Mrs. B. Long of Irma spent a few days visiting at the home of Mr. and Mrs. W. H. Barton.

Miss Helen Doherty, teacher at the Jarrow Junior Room, left for her home at Edmonton last week.

Mr. P. McNab principal of the Jarrow High School and family left for Heiler where they will spend the next two months vacation.

Miss Gladys Bone, teacher of the Batt School left for her home at Sedgewick last Friday.

Miss Bessie Scott, teacher of the Coal Springs School returned to her home at Kinsella last week.

Quite a number from Jarrow attended the picnic held at Penderon's Lake on Wednesday. All report having a good time.

Mr. N. Harvey and S. McGregor who have been working in the Irma oil fields are now home for a few days.

DEE KEEPERS FIELD DAY
AT IRMA THURS. JULY 16
A field day for beekeepers will be held at the Apiary of H. W. Love on Thursday, July 16th. Mr. S. O. Hiller, provincial apiarist will be on hand to demonstrate the handling of bees and give any interesting information on this interesting subject. The meeting will be held a quarter of a mile west of Irma where some fifty hives of bees are located. Anyone, whether they have bees or not will be welcome.

IRMA BRANCH CANADIAN LEGION B.E.S.L.
An executive meeting of the above branch will be held at Cde Cole's office at 8 p.m. on Saturday, July 11th. All committees to report at that meeting.
W. E. Inklin, Sec-Treas.

U.F.A. AND U.F.W.A.
CONVENTION
The convention of the Wainwright U. F. A. and U. F. W. A. Constituency Association is to be held in Wainwright Buffalo Park on Monday, July 20th commencing at 10 a.m. Special speaker will be either the Hon. Mr. McPherson or the Hon. Mr. Lyburn.

Basket Picnic at noon, coffee provided. Come and have a good time.

ANNUAL CHURCH PARADE
The Irma brethren have accepted an invitation from the Wainwright Lodge to attend their Church Parade on Sunday, July 19th. The Lodges will meet at the Masonic Hall, Wainwright at 2.30 p.m. and parade to the Elite Theatre for Divine Service at 3 p.m. R. W. Bro. The Rev. W. S. Brooker, Grand Lodge Chaplain for Alexander County and W. Bro. the Rev. A. M. Trendel, County Chaplain will conduct the service.

EDMONTON FAIR WEEK JULY 13-18

The 49th Battalion Reunion and Church Parade will be held in Edmonton on July 19th at 10 A.M. This will enable members to visit the 53rd annual Edmonton Exhibition, and remain over for the church parade.

An interesting show which has been secured for the Edmonton Exhibition, July 13th to 18th, is Madame Bar's collection of ancient Chinese antiquities—costumes, ceremonial appliances, replicas and miniatures of great value and interest, and including a chamber of tortures, happily now in disuse for many years, but which helps the visitors understand why China is so many years behind the rest of the world in progress and modern methods.

In addition to the fun on the midway every afternoon, and even on the grand stand programme and horse races, two special programmes of fireworks will be given, one on Wednesday and one on Friday night, and these will each outclass any fireworks display ever seen at the fair. A special feature for Thursday evening, July 15th will be the parade of prize winning live stock in front of the grand stand. A last minute addition to the daily programme is Sherlaw & Co. Scotch dancers of Edmonton in a presentation called "A wee Drop O' Scotch".

The Provincial and Federal Departments of Agriculture, the Provincial Department of Health, and the University of Alberta, will have very interesting exhibits. The Provincial Women's Institutes are preparing a splendid exhibit for the Women's Building, and the Alberta Society of Artists will have a splendid exhibit on the second floor of the Manufacturers' Building.

The lowest railway rate in years—fare and one-quarter, has been announced for the Edmonton Exhibition, and a free auto camp, adjoins the Exhibition grounds for families who like to live in a tent and see the Exhibition in leisure.

Minutes School Fair Board.

Minutes of School Fair meeting held in Irma Public School Saturday, July 4th, at 2.30 p.m. Those present were H. W. Whiddon, Bart; Mrs. Schoner, Irma; J. Jones, Albert; Joe Gulbrae, Glenholm; James Bell, Silver Lake; M. McMillan, Alma Mater; Chester Brown, Education Point; Fred C. H. Ross, Joe Carrington, Avonlea. Those absent were, Stan Colman, Orindale; James Donaghue, Strawberry Plains; Elmer Erickson, Coal Springs.

As neither President, C. McLean or Vice President, Blakeley were present, Mr. Fred Challis was asked to take the chair. A number of subjects were discussed, but mostly the Prize Lists. Finally Mr. Jones moved, seconded by Bell, that we use the Point System in distributing prize money. Carried.

Moved by Gulbrae, seconded by Bell, that all nine awards be given. Carried.

Committees for carrying on Fair day were next nominated. Mrs. Schoner was nominated Chairman of Committee on noon lunch and refreshment booth, with power to appoint helpers to carry out same. Moved by Bell and seconded by Whiddon. Cd.

Sports—Moved by McMillan, seconded by Brown that Jones, Bell and Whiddon, act as sports committee.

Live Stock—Moved by Bell, seconded by Whiddon that Gulbrae and Donaghue be committee for Stock C. Vegetables and Grain—Moved by Jones and seconded by McMillan that J. Carrington and A. Blakeley act as committee. Cd.

School Work, Cooking, Sewing—Moved by Mrs. Schoner and seconded by Bell that M. McMillan and E. McLean act as committee. Carried.

All committees are to look after placing their respective exhibits with power to appoint helpers. It was decided to charge 25 cents at the gate for adults to raise funds for expenses and sports on motion of Jones, seconded by Bell.

Motion to adjourn by Gulbrae, seconded by Bell.

A. E. Peterson, Secretary
Irma, School Fair.

Rev. J. R. Geeson visited the site of the Boys' and Girls' Camp at Camp Lake and found it an excellent site, with splendid facilities for bathing, etc.

Bruce Stampede Wed. July 22nd

The fourteenth annual sports and stampede will be held at the Bruce Stampede grounds, under the auspices of the Bruce Stampede Association on Wednesday, July 22nd. This is an event that is looked forward to by hundreds of people as it has become known as the outstanding event of its kind in this part of the province.

The week-end fair will commence at one o'clock with a parade led by the Vegreville Elks band. A full line of stampede attractions will continue until sun down. Prizes will be paid on a percentage of the gate receipts. An aeroplane will be in Wednesday to take up passengers. There will also be horse races, basketball and children's races, and other events that will make the day full of thrills. The day's closing event will be a grand ball in the new Bruce Hall.

H. J. Frederick, is president, and Henry Owens, Secretary-Treasurer, who will give information to anyone interested.

12th JULY CELEBRATION

The Irma L. O. L. No. 2066 will celebrate at Ribstone on Wednesday, July 15th, this year the 12th falling on Sunday. The Lodge will be opened at 7 p.m. after which a start will be made for Ribstone. The Ribstone brethren are preparing a good program of sports and speakers. The Ladies L.O.B.A. have promised to excel themselves in the food department. Altogether a great day is anticipated.

PUBLIC PICNIC

A Public Picnic under the auspices of the Irma Branch Canadian Legion B. E. S. L. will be held at Steffen's Lake on Wednesday, July 22nd at 1.30 p.m. A full afternoon of sports and amusements for every one. Ladies kindly bring eats. Booth on Grounds.

MEN'S WORK SHIRTS 95c, \$1.25, \$1.35, \$1.50

Mass Pessimism

Returning home for a brief vacation, United States Ambassador Dawes at London, England, describes the present economic situation as one in which the peoples of the world are suffering from "mass pessimism."

What Ambassador Dawes says is unquestionably true, but before the prevailing pessimism became general the world was suffering from a condition which as it became intensified resulted in this "mass pessimism" which he deplors and which now has a crippling effect on all efforts to improve conditions.

Without going too far afield, we find that conditions in Western Canada this year are such as to induce pessimism. Thousands of farmers and their families are in dire straits because of widespread drought conditions resulting not only in crop failures but in lack of water and pasture for live stock. No crop in sight for 1931 and added expense in caring for livestock, following as they do upon a short crop or none at all last year, and prices below the cost of producing what may have been produced, have created an acute, a desperate situation for a large section of our population. And the resultant stagnation in agriculture, with an absolute cancellation of purchasing power, has reacted adversely upon all business with the result that unemployment has become intensified in all urban centres.

Such is the situation and it would be the height of folly to attempt to deny it or seek to minimize or ignore it. Such a situation breeds pessimism, first among those who, even when everything is bright and encouraging, always look upon the dark side of any picture, those who seem to be natural born croakers and fault-finders. But just as it only requires right conditions for bacteria to multiply and spread, or for some malignant disease to develop into an epidemic, so these habitual pessimists infect others not usually so inclined but who because of their difficulties and losses are susceptible. Mass pessimism is the result.

Yet it is uncalled for. It is utterly futile. It accomplishes nothing but to make the individual more downhearted and miserable than he or she would otherwise be, and to frighten and discourage others who might otherwise continue on the even tenor of their way, helpful factors in the encouragement of many and in the dissipation of the prevailing gloom.

In time of war there is no one thing which gives a wise general more concern than the maintenance of the morale of the rank and file of his army. Let morale be broken and lost and the best drilled and equipped army in the world becomes a mob. Instead of being a threat to the enemy, it becomes a menace to itself. And the most victorious of armies has to retreat sometimes. It meets reverses, temporary though they may be. It is then that morale must be maintained, when it requires to be pitched higher than ever in the confident hope and expectation of the crowning victory to come. It is only so that victory will come.

There is just as truly a morale in economics, and it is in times of depression, crop failures, falling markets, unemployment, that it must be maintained, not only by the generals and captains but by the rank and file if the nation is not to suffer irretrievable loss and possibly go down to defeat. It is the duty of the people in their own best interests to curb their pessimism. We do not say they should minimize present difficulties, because they should be frankly faced and efforts made to overcome them, but they should not be magnified. Nor should difficulties and troubles be imagined where they do not exist.

We do not believe people can pull themselves up by their boot straps, but we do believe they can refrain from stepping into quagmires. They can keep their feet on firm ground and not supinely slip into a slough of despond. And now is the time to do it.

What is this mass psychology anyway? It is simply a lack of individuality on the part of the many. A man stands on a street corner gazing up at nothing at all and soon he is surrounded by a crowd craning their necks looking at exactly the same thing. A man says things are hard and the one to whom he says it, even though he be better off than ever before, dolefully shakes his head, buttons up his pockets, repeats the same story, and thus helps to make times hard when he would be the gainer by adopting exactly the opposite course and thus help to improve conditions.

Be an individual. Be yourself. Stand out from and away from the mass. Think and act with hope in your heart and an eye to the future. By so doing you will not be making conditions harder, you will not be discouraging others, on the contrary, you will find your own burden lightened, your own outlook improved, your courage renewed.

Ranch Will Breed Cattaloos

Young Buffalo Bull Shipped By R.C. Authorities To Peace River

British Columbia's first herd of cattaloos, half cattle, half buffalo, are expected to result from the shipment of a young buffalo bull from Beacon Hill Park to the Peace River district. This animal is being presented by the city authorities to Mrs. Emily L. Crawford, pioneer rancher of Fox St. John, for crossing with her cattle. He will be the first buffalo liberated in this province outside a park, the Department of Agriculture here understands.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any drugist's.

An Englishman has invented a table with legs which adjust themselves to uneven floors.

When it comes to underestimating himself a man seldom overdoes it.

Dysentery Is a Very Dangerous Bowel Complaint

Mrs. E. M. Ward, 627 Ave. H. South, Saskatoon, Sask., writes: "When my husband was in France he took dysentery, and was in hospital over a year. Ever since he came back he has had the attacks three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry does for him. He generally takes a few doses and gets relief in a few hours."

"If I speak too highly of your excellent remedy, you may be sure we are never without a bottle of it in the house."

A Provincial Pleasure Resort

The Opening Function Of Lake Manitou Provincial Resort Attracts Great Gathering. Saskatchewan, making a definite bid for its proportionate share of the approximately \$300,000,000 spent by tourists in Canada, annually, has supplemented its aggressive all-weather road policy by establishment of one of the most unique and attractive tourist and family resorts in the Dominion.

On July 4, Hon. J. T. M. Anderson, Premier of the Province, officially opened Manitou Lake Lodge, the central building of the camp site which is located in the Provincial Park which flanks the shores of Little Manitou Lake, renowned for the medicinal properties of its waters.

Hon. J. A. Merkle, under whose direction the relief work has been conducted, and other members of the Cabinet, as well as a considerable number of Canadian journalists, who were attending their annual convention at Regina, were present. There was a great gathering of people from almost every part of the Province and from outside points, and the occasion was in every respect a gala one.

This marked the establishment of Provincial Summer resort, convenient of access to the people of the prairie region, delightful in its natural beauties, providing good accommodation for a large number of the requirements desired by those seeking rest and recreation.

Its establishment is part of a Provincial programme to show the people of the Province, that after spending their working days at home, they do not need to seek their rest and recreation abroad. Saskatchewan

Lake Manitou Lodge built by the Government of Saskatchewan to supply work for unemployed farmers. Native stone was used in construction and the roof is thatched with rushes cut from the marsh lands near by. The photo shows the building in course of completion.

summer days are long and fair; natural beauties are many and varied, and there is need to look elsewhere for holiday grounds. To those journeying at Lake Manitou this season, it will be pleasant to contemplate, that many of the facilities which minister to their pleasure and comfort, their recreation, furnished were worked and wages to many a bread-winner. That perhaps was the keynote that prompted the development of this resort.

Manitou Lake which lies close to the town of Watrous on the Canadian National Railway, is a lovely oasis in the midst of a wide region of level prairie, between the northern end of Manitou Lake, and the South Saskatchewan River. It is the natural "Spa" of the Province, and the summer resort for the people of a wide extent of the Prairie country.

It occupies a blind valley with neither inlet nor egress that some insatiable movement of nature has caused to be scooped out of the surrounding plain. The banks are covered with a lovely wood of aspen, and slope away in fine sandy beaches at the water's edge.

The waters of the lake, which change their colours as the cloud shadows sweep across their surface, are ideal for swimming, boating, and summer sports. From time immemorial, the Indians believed they were endowed by the Manitou with healing virtues, and many a weary caravan bringing sick and suffering to seek relief, halted by the banks.

Nor was this an idle belief. Science declares that the waters of this lake may have a real value in skin and rheumatism affections. Remarkable cures have been ascribed to imbibing and bathing.

Situated as it is, not only convenient to railway transportation, but on fine highways, which make it easily accessible from Regina, Moose Jaw, Saskatoon and other prairie points, and possessed of almost every qualification for summer holidaying, it is not to be wondered at, that this Provincial Park is rapidly becoming the Mecca of summer vacationists from all over the province. The Provincial Government realizing this, last winter so arranged a portion of its unemployment programme, as to have added something by art to what nature has already done to the place. The first object was to relieve unemployment, and the second to develop Manitou Lake and its surroundings as a Provincial Park. With these ends in view much work was done during the winter and spring.

There are about thirty acres, originally thickly wooded with the graceful native poplar. Men were sent to work to clear roads and paths and camp sites. A picturesque lodge has been erected, almost entirely of native material - and sixteen excellent cottages built. The collection of the stones for the buildings afforded much needed employment for farmers with their teams from a wide district. In many cases dual objects were served - the furtherance of the work on hand, and removing the stones from the land. The open winter greatly facilitated this work.

The lodge and the cottages are thatched with rushes from a small bay of the lake. They were cut after the water had frozen, when the farmers harvested them by means of moving machines driven over the ice. They were then sorted and tied in bundles by men experienced in this work. It was discovered that there were a number of men among the unemployed from Ireland and elsewhere, who were experienced thatchers, and these men were entrusted with the roofing work. Not only has a picturesque effect, reminiscent of lovely British cottages, been achieved, but the thatch is proving to be both serviceable and economical.

The lodge is equipped with modern conveniences, including running water and electric light, and there is water and light in all the cottages. A cooking kitchen 51 feet long by 8 feet wide has been built for the convenience of cottagers and campers, and in its longitudinal plan provides accommodation for many summer cooks without conflict in their operations. A great deal of work has been done in clearing roads, and in making winding and attractive paths through the woodland groves. Convenient camp sites have been prepared, with flat camping space for the tent, and parking ground for the car. The arrangements in connection with the sites are handled from the Lodge.

An exterior view of the Lodge is picturesque and attractive. Built entirely of native stone the walls rise from a terrace surrounded by a stone esplanade, garnished with stone electric light standards in the middle and at the end. Cement steps lead from the terrace to the main entrance, a wide and airy rotunda with a fine stone fireplace. On the east wall there are two stone electric light standards, and on the west a staircase leads to a gallery which encircles the whole rotunda. On the second storey there are ten rooms for the accommodation of guests. At the west end of the Lodge on the ground floor, there is a den with built-in bookshelves, and on the second floor, a private suite of rooms. The east end is also divided into suites.

An attractive rock garden has been prepared at the front of the lodge. A fountain has been built, and the slope leading to the main entrance terraced. A flagstone walk bordered with native stone leads from the lodge to the beach, where there is a stone pier. The flagstone walk leads to a large, where there are artistically terraced lawns and a half mile of stone bordered beach. On the one way traffic, have been laid out. The entire area of the Park has been circled by a bridge path, cut and rock bordered.

The work at Manitou Park was the main used as a centre to provide employment, sorely needed for people from every part of the province. Practically all of the teaming, and goodly proportion of the work was done by farmers of this class. Approximately 500 men went through the payroll on a rotation system that was designed to be as equitable as possible. About 10 per cent of the workers came from the farms, and a number of them lived at home, and were enabled to go and from their work each day. Workers from distant points, and those unable or too far away, to return home each evening, were well looked after in the quarters of the sanitarium company. There were about 165 workers of this later class employed.

About \$50,000 was disbursed in this way, half of which was paid by the Federal Government, and the other half by the Province under the unemployment arrangement. Practically the only portion of this sum spent outside of the Province for material went for hardware and cement. There is a fine spring of fresh water that wells out of the hillside, and which has made possible an ample supply piped into the lodge and cottages, and is available for the use of the campers. A scientific system of septic tanks provides for the sewage from the lodge in a modern and hygienic manner.

The beaches are delightful for bathing and swimming. The slope to the beach is gradual, and there is little fear of accidents to the children who delight to paddle along the shore. The waters are buoyed with plant for swimmers, who require little effort either for support or propulsion. The swimmers can remain cradled in the embrace of the lake, and float in gentle undulations oblivious of the world and its cares. The healing qualities of the water are remarkable, and bathers suffering from minor wounds or abrasions after a few immersions, find they have disappeared as if by magic. There are boats available, and during the season a merry laughing throng, are invariably engaged in aquatic sports. Riding a surf board towed by a motor-boat is a popular sport, and it is the very poetry of youth and action to see a handsome girl erect upon a surf board coursing through a cloud of spray. There is good links close at hand, where the devotees of the "ancient and royal game" may brandish mallet and driver and cry "fore", to their heart's content.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAMP BEFORE: After many adventures in China, Captain Jimmy meets an old friend, Lieut. Stone, the two escape from bandits in a freight train which is wrecked in enemy territory. Finding the soldiers they set out to find a plane they had hidden in the woods.

By the time I had forced my horse through the mud, Scottie had got himself untrampled from the officer and was in pursuit of Jed. Stone who was a horse for himself and was busy setting out a trap for the enemy.

Such yelling and cheering, on another, every man for himself. We were a hundred yards or more away before a single shot was fired. At that distance we might as well have been home in bed for all the danger of those soldiers hitting us.

Except for a lot of shooting, there was little attempt at pursuit. We circled about the woods and after going a few miles, turned out again to the railroads. The train was a fine one, a thick, I was suddenly confronted with a great war whoop I started forward.

There, just as we had left it, stood our old plane. A hurried check showed that it was just as we had left it. It was so good, no oil, no anything! A fine situation. There we were, with a perfectly good plane, powered with a tremendous engine that used so much fuel it called for a gas station. It was a gas station, and we had just about the only one in the area. I went in a suit of clothes.

"Well, that's about all from the soldiers," Jed Stone suggested. "It's, it's, it's," I laughed, "and while you're here, I'll have a ten-cent dinner for each of us. My stomach is so empty it's disgusting. I'm hungry."

"Quite right," he said, "We'll just do it."

Of course, it may not be a ten-cent dinner, but we will eat as much as we can after—just as soon as it is dark. Our plan was perfectly simple. If it worked, it was grand. If it didn't, we wouldn't need any more gas and oil. We settled down to wait for darkness. A long, hungry wait it was, too, till midnight.

We were wounded, Lieutenant Stone, Fu Hau (the interpreter) and I. Scottie trotted along on foot. With every possible precaution against making any unnecessary noise, we circled the plane where the old engine lay on our back. About a mile below that spot we crossed the tracks and shaped our course for the sleeping camp—a couple of miles for the horses. Fu Hau and Scottie stayed with the horses—Lieutenant Stone and I went forward to reconnoiter. All was quiet in camp. Sentries pacing up and down the barracks once more we arranged our plan. Fu Hau, on pain of death, agreed to stay alone with our horses.

Perhaps half a mile from the camp, we dismounted. The horses—Lieutenant Stone and I—went forward to reconnoiter. All was quiet in camp. Sentries pacing up and down the barracks once more we arranged our plan. Fu Hau, on pain of death, agreed to stay alone with our horses.

Scottie went in. He much preferred to stay with me, but Jed Stone needed his plan. I crept quietly back to the tent. (To Be Continued.)

The health-giving, delicious drink for children and grown-ups. Pound and half pound tins at your grocers.

H.B. Trial Shipments

Nothing But Wheat To Be Shipped Over Bay Route This Year

"Nothing will be shipped out of Hudson Bay this year except wheat," said Hon. R. J. Manion, Minister of Railways. Dr. Manion had been asked by the department towards requests for trial shipments of cattle later in the year.

There would be difficulties enough in making trial shipment of wheat without entering into other projects, Dr. Manion said. He drew attention to the lack of feeding facilities at Churchill as an example of the handicaps facing any attempt to ship cattle. The department had been deluged with requests of that type but all had been refused.

Conquers Asthma. To be relieved from the terrible suffocating cough of asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. D. Kellogg's Asthma Remedy bring prompt relief, but it introduces a new era of life for the afflicted. Systematic inhaling of smoke or fumes from the remedy prevents re-attacks and often effects a permanent relief.

Second Ditto: Oh, that's the noise you mustn't swallow your tea with when there's company.

A lazy man will take any kind of job he can't get.

Depression Hits Icebergs

Not For Many Years Has There Been Anything Like Present Shortage

It takes quite a bit of water to make a sizable iceberg. No one who has seen one of these floating samples of the Arctic zone would take issue with this statement. One ordinary iceberg carries around enough concealed moisture to irrigate a ten-acre farm all summer. Coastguard craft, which annually proceed to the nesting grounds of the icebergs for the purpose of warning shipping of their proximity to steamer lanes have found a scarcity of them this year. Icebergographers say the situation is without precedent.

Not in a great many years has there been anything like the present shortage of icebergs in the north Atlantic. Last year 440 of these gorgeous spectacles of the sea were reported in the areas of sea travel, but this year only two little tramp bergs were located and so far away from steamship lanes that it made it unnecessary to tie cowbells around their necks—Christian Science Monitor.

More than 7,500 varieties of toy soldiers with the uniforms worn all over the world for 2,000 years were exhibited at the Leipzig Fair.

The smallest whales are about 20 feet long when full grown.

So Many Home Uses!

Keep food fresh longer by covering them with Par-San!

Use Par-San to keep Dad's lunch fresh!

Keep the freshies in sandwiches prepared for the party with Par-San!

YOU'LL FIND A hundred vital, saving uses for Par-San Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged packages. For less exacting packages: "Cent" Pull Waxed Tissue (flat sheets). At grocers, druggists, stationers.

Cunard Line's Oldest Known Living Passenger Will Make Atlantic Crossing In New Vessel

If she can make the trip, Mrs. Loring W. Bailey, the Cunard Line's oldest known living passenger, will make a trans-Atlantic crossing in the new 73,000 ton steamer now being built for the line on the River Clyde, Scotland, the first of a pair of swift mammoth ships that will supply a weekly service between New York and ports on the English Channel, making the voyage in four days.

Mrs. Bailey made her first trip to Canada on the Cunard liner "Cambria," in January, 1848, more than 83 years ago. The "Cambria" was a side-wheeler, carried sails, and made the voyage from Liverpool to Halifax in two weeks, being delayed by rough seas followed by dense fog. Her schedule time was ten days.

Mrs. Bailey, who is now in her 90th year, enjoys excellent health and recalls with remarkable distinctness the happening of a long and varied career. She is especially proud of the fact that she is the oldest living passenger of the Cunard Line, which had its beginning in her beloved Canada, in the old gray city by the sea (Halifax) where Samuel Cunard laid the foundations of the famous Cunard Line of today with a fleet of twenty-two ocean liners plying between Europe and America.

Born Lauretine Marie d'Avray, Mrs. Bailey was the daughter of the Baron d'Avray, and first saw the light of day on the island of Mauritius, in the Indian Ocean, off the east coast of Africa. It was then and still is one of England's sugar bowls and not a small one either.

When Lauretine was five years old her parents took her from her tropical home on a journey which was to end in cold Saint John, New Brunswick, where the Baron had secured a position as Superintendent of Education in the Maritime Provinces. The journey was a long one. The family embarked on a sailing ship bound for Queenstown, sailing around the Cape of Good Hope. It took two and-a-half months to reach the Irish port, their ship passing but one steamer on the entire voyage.

After visiting London and Northern France the d'Avrays set out for Liverpool, where they embarked on the "Cambria" for Canada.

Landing at Halifax in mid-winter, Lauretine saw snow for the first time. She thought it was salt until she tasted it, but could not understand why it was so cold nor why it quickly melted in her warm fingers.

In travelling from Halifax to Saint John the family passed over the Cobequid Mountains, in Northern Nova Scotia, in a rude but covered wagon, which was drawn for more than a hundred miles through the frigid country over glare-ice. Railroads had not yet made their appearance in that part of the country.

The girl's father was very successful in his new post and was promoted until he held the chair of modern languages in King's College, now the University of New Brunswick.

It was while living at the college that Lauretine met and married a young professor who had come from Harvard, Loring Woart Bailey, who afterwards became famous as a scientist, and who was designated as a charter member of the Royal Society of Canada by the Marquis of Lorne. Dr. Bailey's service at the University extended over 47 years.

For many years the Baileys spent their summers at Fredericton. It was here that they celebrated the silver and golden anniversaries of their wedding.

After the death of Dr. Bailey at the age of 86, Mrs. Bailey moved to Halifax, the scene of her first landing in the New World. Here she was a guest aboard the Cunard liner "Aquitania," when that giant ship docked at Halifax on July 4, just 91 years after the first Cunarder, the "Britannia," set out from Liverpool, a pioneer in the world of modern shipping.

Recently in speaking of the Samuel Cunards, Mrs. Bailey said: "I knew the Cunards when they lived in Chatham. They used to visit

Sheriff Woolhaupter in Fredericton. Mrs. Cunard gave me a small statue, about one finger high, when she left Chatham for England. I still have it."

To Stimulate Livestock Sales

Country-Wide Project To Establish A Market Overseas For Canadian Cattle

A gathering of 120 stockmen at Brandon unanimously favored a country-wide project to establish a market overseas for Canadian livestock and livestock products. The meeting, composed mostly of members of the Manitoba Livestock Pool, supported a plan of direct overseas sales to the powerful Co-Operative Wholesale Society of England, outlined by H. S. Arkell, superintendent of the Canadian Livestock Co-Operative. The proposal is to be placed formally before the six provincial bodies for which the Canadian Co-Operative is the selling agency, namely, Manitoba, Saskatchewan, and Alberta Co-Operative Livestock Producers, Ltd.; United Farmers Co-Operative Co., Ltd. (Ontario); Co-Operative Federes de Quebec; and the Maritime Livestock Board, Inc.

Fox Feeding Guide

Keeping In Step With Season Found To Bring Best Results

Keeping in step with the season is the way to ensure best results in fox feeding, studies in this respect at the Experimental Fox Ranch of the Dominion Department of Agriculture at Summerside, P.E.I., show. The report for 1928, 1929 and 1930 just issued states: "It is absolutely necessary that foxes should be fed in step with the season. When the earth is covered with green vegetation foxes require that vegetation, or the essentials of it from animals that have recently been eating it; during the fall months when ripe vegetation is prevalent, foxes require that ripe vegetation. In the late fall months when frost has destroyed vegetation and the prey of the foxes is in good condition for a high rate of nutrition. When the prey of the foxes is in poor condition and the vixen and her prey are often snowed in, foxes do not require a large amount of food."

The Wool Crops

Co-Operative Wool Growers Give Summary Of Quality Of This Year's Clip

With much wool from Ontario already graded and cars beginning to arrive from all parts of the country at the various warehouses of the Canadian Co-Operative Wool Growers, officials of that organization are now in a position to make a fair summary of the quality of this year's clip. That from Ontario is strong in staple and bright, while the first of the clip from British Columbia indicates that the present wool is well up to the standard of previous years. Western Range wool is strong and exceedingly well grown, but shows marked evidence of the recent sand storms.

Milk A Bone Builder

Another Good Reason For The Liberal Use Of Milk

Scientific research finds another good reason for the liberal use of milk, especially in the diet of the growing child, and that is in its capacity as a bone builder. The human body contains more calcium than it does any other mineral, and the best and cheapest source of supply is milk. Dietetic experts assert that a quart of milk daily ensures the growing child of the best storage of calcium for the manufacture of bones and teeth. It is equivalent in calcium content to 10 large oranges, 10 large helpings of cauliflower, 24 helpings of carrot, 32 eggs, or 20 pounds of beef—Department of Agriculture, Ottawa.

Speeds Ripening Of Tomatoes

The farmer doesn't very often get a chance to fool Jack Frost, especially on a soft crop like tomatoes, but experimental work at Morden, Man., by the Dominion Department of Agriculture shows conclusively that this can be done. With the advance of the season tomatoes ripen more slowly and the use of ethylene gas speeds up the process from late August on. Fruit in danger of frost damage can be picked and quickly ripened by the use of this gas.

The Republic of Andorra, a small country lying between France and Spain, pays its President a yearly salary of \$15.

Tree Planting Plan

Ten Year Policy For Establishment Of Wind Breaks On Saskatchewan Farms

Inauguration of a Saskatchewan government ten-year tree planting plan for the encouragement of the establishment of wind breaks on the farms throughout Saskatchewan was announced by Hon. J. F. Bryant, Minister of Public Works.

The tree-planting policy, which will be run in conjunction with the tree-planting policy of the federal government through its forestry farms at Indian Head and Sutherland and the various experimental farms operated by the federal government, will include the planting of over 100 acres to caragana seed for the purpose of growing seedlings for distribution among the farmers of the province under a supervision plan.

In addition to the tree-planting policy, the federal and provincial governments are inaugurating a joint grass seed policy whereby seed will be distributed among the farmers with a view to increasing the fibre content in the soil and retaining more moisture.

More Space For Cattle

New Arrangements Made For Shipment From Canada To England

A great deal of additional space has been secured on steamships in which to move cattle from Canada to the United Kingdom it has been announced by Hon. Robert Weir, Minister of Agriculture. Since the movement of cattle to England started this season the results have been of such a character that many more cattle were available for export than the original space contracted for would take care of.

The new arrangements mean that there will be space to ship over 10,000 head from now until the end of the season. The rate will be unchanged, namely \$15 a head.

Leaves Estate To Poor

Quarter Of A Million Dollars Bequeathed To Destitute Of London, England

Mrs. Mary Prior, a widow of Kingshorpe, Northamptonshire, England, has left the residue of her estate totalling nearly \$250,000 to help the down-and-out sheltering nightly in the crypt of St. Martin's Church in Trafalgar Square, London, England. This method of assisting the destitute in the heart of London, was instituted in 1824, when Rev. Dick Sheppard, the rector, curtained cubicles and provided for men and women. The destitute were given cushions to sleep on the benches. Food tickets are also supplied.

British Not Barred

May Come To Canada But Strictly On Their Own

"There is no restriction at all on immigration from Great Britain," Hon. Wesley A. Gordon, Minister of Immigration, told the House of Commons. "The only difference is that we are not actively encouraging movements into Canada. Any Britisher who desires to come to Canada, under his own steam, is free to do so."

With regard to the continent of Europe there had been rigid restrictions imposed.

Germans Invent Boat-Tent

A combination boat-tent has been designed by an inventor in Germany. The boat of light rubberized fabric, is inflated and may be used for paddling over lake or stream or as a mattress. Two light wood frames, a telescoping ridgepole and a light waterproof putter complete the portable camping outfit.

"Mother, I don't think hens will ever go to heaven."

"Why not, child?"

"They lay eggs on Sunday just as if it were Monday."

Would Increase Value Of Fish Industry

Fish Flour Is New Product Not Yet On Market

From \$500,000 to \$1,500,000 annually may be added to the value of the fisheries industry of the country by the development of "fish flour," Henry O'Malley, Commissioner of the U.S. Bureau of Fisheries says.

Produced from the edible parts remaining from the filleting or packing of fish, the new product is dried and ground into a fine meal with a pleasant taste, odor and fluffy appearance. The new flour is more highly refined than the fish meals used for feeding animals, and in cooking may be easily mistaken for the fish taste unrecognizable, Mr. O'Malley said. At present the flour is not available commercially.

Provided the public takes to the new product, there is a potential production of 20,000,000 pounds of raw material available. It is estimated. Much interest has been shown in the work of developing the flour by national manufacturers and distributors of bakery products and specialized food products.

The bureau has succeeded in making very edible fish flour cookies, he said, which is lacking in vitamins and almost lacking in proteins. The problem lies in showing that the amounts necessary to make up for this deficiency are found in the remainder of the diet.

"The deficiency of a vital element cannot be made up by taking an excess of another," he added. Experiments had proved this. It has also been demonstrated that when fed on special foods children had reached greater growth than those fed a "normal" diet.

The difference in the vitality between the Oriental and the Occidental people had been traced by an authority.

A Nation Of Fruit Eaters

Average Per Person In Britain Last Year Was 83 Pounds

British people are rapidly becoming a nation of fruit-eaters, according to the Empire Marketing board's report on fruit supplies in 1930. "Last year more fruit was eaten in the United Kingdom than in any previous year," states the report, which mentions that the average consumption was 83 pounds for every man and woman and child. This was an increase of 12½ pounds per person over the previous year.

A pleasing feature of the report is the statement that a higher proportion of the fruit imports was supplied by the Empire last year than previously. Nearly 62 per cent of apples, 40 per cent of the bananas and more than half the peaches were Empire-grown.

Revealing Old Secrets

Settlements Of Olden Times Being Discovered By Aviators

Secrets of antiquity that have remained hidden for centuries are today being brought again to the knowledge of men by the aeroplane. In Britain, the Middle West, and other historic regions, throughout the Empire an air-borne camera is revealing details of towns, settlements and works of olden times that are assisting archaeologists mightily in their reconstructions of the world as it was fifteen, twenty or more centuries ago.

Keeping Cream Fresh

Studies in keeping cream sweet made by the Dairy and Cold Storage Branch of the Dominion Department of Agriculture, show conclusively that iced water not only keeps cream better than when it is placed in a refrigerator, but that it takes considerably less ice. The reason for this lies in the fact that the iced water, being a better conductor than the cold air of the refrigerator, cools the cream more quickly.

New hose equipment makes it possible to direct a stream of water around a corner, thus helping firemen to reach some fire spots more effectively.

Plea Is Made For Retention In Canada Of Able Men To Carry On Important Research Work

Keeping Up Vitamin Supply

Diet Of Milk, Meat, Eggs, Vegetables and Fruits Is Very Helpful

Medical science still knows comparatively little about the necessities and supply of vitamins, although it recognizes that they "produce profound changes in growth," Dr. F. F. Tisdall, of Toronto, declared in a scientific session of the Canadian Medical Association at Vancouver.

"Everyone in the world seems to know all about vitamins but the medical profession," he remarked. After demonstrating by slides the result of experiments with vitamin diets, he concluded by stating that, as a practical application of what is known, a diet of milk, meat, eggs, vegetables and fruits, should go a long way in supplying the essentials to proper nutrition.

Fifty per cent of our diet today is made up of refined flour and sugars, he said, which is lacking in vitamins and almost lacking in proteins. The problem lies in showing that the amounts necessary to make up for this deficiency are found in the remainder of the diet.

"The deficiency of a vital element cannot be made up by taking an excess of another," he added. Experiments had proved this. It has also been demonstrated that when fed on special foods children had reached greater growth than those fed a "normal" diet.

The difference in the vitality between the Oriental and the Occidental people had been traced by an authority.

At least ten minerals are essential to life, said Dr. Tisdall, but all except three are found in sufficient quantities in our normal diets. The three are calcium, iron and iodine.

Weaning Young Pigs

Natural Weaning Has Been Found To Bring Best Results

Natural weaning gives best results with a litter of young pigs, and to obtain this, feed suitable for young pigs should be provided in the creep. A good mixture for the purpose is a half and half combination of midlings and finely ground oats from which the hulls have been sifted. Young pigs will start to nibble at the feed at about two to four weeks of age, and by the sixth or seventh week should be eating fully freely. Under such a procedure shock incidental to more abrupt methods is overcome and weaning develops as a natural event.—Pamphlet 135 N.S. Department of Agriculture, Ottawa.

Mining In British Columbia

1930 Showed Greater Mineral Production Than Any Previous Year

British Columbia took more ore out of its mines in 1930 than in any previous year, according to the annual report of Hon. W. A. McKenzie, Minister of Mines. Reduced prices in the world's markets cut down value to \$5,391,993 from the 1929 record figure of \$68,254,443, but in comparison with most past years the 1930 total is high. Ten years ago, in 1921, for instance, the mines of the province produced only \$28,000,000. Mining companies in British Columbia last year paid dividends of \$12,527,653, only a slight decrease from the record figure of \$13,642,305 paid in 1929.

Cattle For British Market

Twenty-seven cars of pure bred cattle arrived in Winnipeg from further west the other day en route to the British market over Canadian Pacific rails. This is the seventh shipment of the kind from Western Canadian ranches since last October.

Long distance racing matches for homing pigeons date back to 1518.

Need for a better understanding of the significance of and necessity for research was urged by Dr. H. M. Tory, president of the national research council, Ottawa, Ont., addressing the Canadian Society of Technical Agriculturists, in session at Guelph, Ontario. He advocated more co-operation between scientific men.

A plea for the retention in Canada of able men was made by Dr. Tory, who deplored the circumstances which led to the best brains leaving the country.

"You can't make a first class country with second class men," he said. "We must hold onto our best brains. We have material out of which to make leaders for every activity to be found in Canada," he stated in an address in which he traced the development of national research movements throughout the world.

Production costs will strike a level that will help to stabilize land values, said Dr. O. C. Stine, president of the American farm economics board, who also spoke. While the next two or three years might mean a great deal of suffering to producing countries, he said, the outlook now is brighter than it was a short time ago.

Growth of the organization during the past year was reported to members by W. T. Macoun of Ottawa, in his presidential address.

Mr. Macoun emphasized the fact that three new branches of the organization had been formed during the year, and reported increased activity in all departments of the society's work. He urged the members to pay more attention to the average man and suggested extension work of the C.S.T.A. be increased in the future.

Egg Consumption Is High

Per Capita Consumption Of Eggs Higher In Canada Than The U.S.

Prof. J. V. Rice of Cornell University recently called attention to the Canadian per capita egg consumption which is shown as 26.8 dozens, whereas that for the United States for the same year is shown as 16.7 dozens. While these figures are for 1925, as the figures from the most recent United States census have not as yet been made available, they show that Canada increased her per capita consumption from 15.1 dozens in 1901 to 26.8 dozens in 1925, and to 30.8 dozens in 1930, whereas that for the United States has hovered around the 16 dozen figure for some 30 or more years.

The editor of a produce journal in the United States comments as follows: "It would seem that the Canadian figures would give a fair answer to the question as to whether or not our increasing production of eggs can be disposed of by increasing consumer demand. No doubt, more careful standardization of quality will have some effect upon consumption but it will take, as well, considerable additional effort to bring our per capita consumption up to the same level as that in Canada."

Not Of Great Price

"You're looking bad, old man," said an acquaintance to Browne. "What's the trouble?"

"Domestic," answered Browne. "But you always said that your wife was a pearl," remarked the friend.

"So she is," returned Browne sorrowfully. "It's the mother of pearl that's the trouble!"

Butter Exports

Butter exports from the Port of Montreal during this season to date amount to 24,885 boxes or 1,394,120 pounds, as compared with nothing at all at this date last year. A belief prevails that this may be the beginning of a resumption of export trade on a substantial basis.

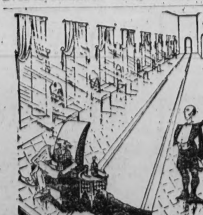

ENGLISH ROWING BELLES COMPETE ON THE CONTINENT

Above are seven members of the rowing crew which will represent Great Britain at Lucerne, Switzerland, at the international rowing regatta. These girls will compete against crews of German, Belgian and Swiss girls in several events.

"You annoy me from morning till night, Minnie." "Impossible, madam. You are not up till mid-day!"—Fliegende Blaetter, Munich.

"Did you ring sir?" "Yes. There is a fly somewhere in the room."—Kasper, Stockholm

Communism.

SOME SUGGESTIONS AS TO A WAY OUT

(The Third of a Series of Three Studies by J. W. Bainbridge.)

When Mr. James Woodsworth, Member for North Centre Winnipeg, made his speech in reply to the Speech from the Throne, most of the Members vacated the House, and left the Chamber practically empty. Mr. Woodsworth, in a general sense, was speaking on behalf of the farmers and Labouring men of the West, and according to Hansard, his speech was one of the most serious and intelligent presentations of the present situation in the West, yet, apparently, it was not of vital interest to the Members of the Government. When McKenzie King, in his lengthy speech recently, made reference to the serious situation in the West, the Premier laughed! Now, my first suggestion as to a Way Out from this precarious situation is, that all intelligent thinking people, particularly our leaders, need to honestly and frankly face the present conditions. We naturally avoid the unpleasant, and we can readily find alibis for existence, but the perishing and starving have a desperate cry, and God's answer is one again made, and, therefore, "You are your Brother's Keeper."

A Change Needed

One reason why many of us hate Communism is because of a troubled conscience. Our vast social wrongs stare us in the face and will not down. We cannot solve them by a 'Hush, Hush' policy, blind, deaf, and dumb to every social wrong, praying only for a return to prosperity. The Reds we need mercilessly to hunt are the red wrongs of suffering humanity, the growing evils of our unjust social order. When Jesus met a group of unemployed, He did not deal with them as an economic problem, but as a human problem. He dealt with them according to their human needs. Economic laws and processes do not belong to the root of things, they are entirely man-made, and, therefore, quite subject to change. After all, the wealth of a nation is its people, its men, its women, its children; and a system which permits the periodic wastage of its human wealth is in sad need of overhauling and reconstruction. We have been subject to a vicious cycle for some time. However, there are features of our present conditions which do not belong to an economic cycle, but rather are characteristic of a new epoch, calling for a step outwards and upwards. In the evolution of our civilization, religious reformations have brought religious democracy; who not an industrial reformation to bring about Industrial Democracy. Our present system needs to be adjusted so that it will incorporate all the workers, with hand, brain, heart and soul, and our accumulated wealth (remembering its origin) all the experts with their skill, all the politicians with their administrative ability, and the church representing the presence and oversight of the Great Co-Partner. Such a change would not mean doom but rather Dawn, and the coming of a better standard of civilization. Let me remind us, that after all, every element of this corporation I have just outlined, is an intrinsic part of the Nation's temple, arily entrusted to individuals merely for about seventy years. Yet what a privilege and opportunity it affords us.

Better Control Needed

One of the changes such an adjustment would effect would be better control of the main factors of our economic system. M. H. H. a Russian engineer, in his "New Russia's Primer," used in the Public Schools for Russian children under fourteen years, contrasts America with Russia. He emphasizes the fact that Russia has a system by which all its resources are to be controlled for the benefit of all the people, while America has no system, but "every man does that which is right in his own eyes." Is he right? He cites actual instances when fruit growers have dumped a whole cargo of fruit into the sea in order to retain the market price of what is left; manufacturers will make a huge profit on some new commodity, then competition will be developed and a great struggle will ensue involving strategic advertising and all kinds of tricks of trade to induce people to buy their wares. Many other similar illustrations are given to prove his point. Surely many of our methods are ridiculous. We need a system of control.

The way in which accumulated cornered money can tie up our national and international industry is absurd, more especially when we remember that money was originally intended to be merely a means of transfer. Mr. Hoover has realized this fact and acted upon it in a practical way, and the world in general is thankful to him as a temporary benefactor. If Mr. R. B. Bennett had realized the same

fact, and commandeered some of the cornered wealth of our country, by means of an increased Income Tax instead of lowering it — we might have had some hopes of a system of practical control of wealth for the benefit of all. Control of wealth by the State, and by Inter-States, so that it will be distributed more adequately for the benefit of the Mass is One Way Out of our present dilemma. Why should the progress of civilization be held up simply because money has become congested into the hands of a few?

Again, control of Natural Resources so that the people in general will gain the ultimate benefits, is another suggestion of a Way Out. What right has accumulated wealth (often times belonging to outside sources) to make more wealth at the expense of the resident people from the handling of resources actually belonging to the people?

Further, Inventions, Discoveries, and Patents, should be so controlled that the people will get the benefit of modern science. Otherwise, Science, in its great advances, is actually going to be a detriment to the Mass. We can use modern time-and-labor-saving devices, and, if they were kept within the purchasing power of all, there would be more used and more employment created in making them. Moreover, most people can use modern science and energy, to better advantage than in mere manual labor.

Finally, we need a control system so that we as a whole can take the benefit of large corporations and monopolies without jeopardizing the livelihood of human beings. Experience has taught us that when Science, Expert Administration and Direction, Use of Capital, and Use of Labor are incorporated we have the best way to produce at a minimum cost. It is essential that we embrace this realization and apply it for the benefit of humanity as a whole. A program of industrial co-ordination is essential as a Way Out, particularly for our farming industry.

All these four suggestions, and many more, can be adopted by a wise government without any phase of peaceful revolution, and, eventually, they would be effective enough to meet most of our needs. Up to the present the difficulty with most of our governments seems to be that they are determined to restrict their solutions to the stereotyped lines which have failed in the past.

New Vision and Inspiration Needed.

I have one other suggestion to make, namely that our generation needs to be imbued with new vision and inspiration. We cannot but admire many phases of the Youth Movement in Russia, and, perhaps, better still, the Youth Movement in Germany, which latter aims at the re-education of a Nation of the strongest calibre—physically, mentally, and morally. Dean Inge defines the situation in Russia as "An omnipotent government aiming at the 'complete mechanization of man,' and he is not far wrong. On the other hand, we cannot look at their Comprehensive Vision, their Faith—stronger by far than most religions, their Zeal—greater than that inspiring any of our Christian Missionary programs, and their Self-Sacrificing Work, without catching something of their passion to make the world more fit to live in. The thing that troubles me is not that we have failed to discover a solution for our own depression and confusion, but rather that we are so slow in discovering our need of one or of insistently demanding one. If anyone asks us to put our own house in order, someone cries "Socialist! Communist! Radical! Bolshevik! Traitor!" Face the situation, and we see a change is inevitable. My plea is, let us Evangelize the inevitable. Instead of wasteful conflict I am appealing for fruitful co-operation. Instead of a self-complacent negligence or mock-religious indifference, I am appealing for wide-awake champions of Christian Justice to express the Principles of the Kingdom of God. I would like to see a Youth Movement inaugurated among the English speaking peoples of the world, to flame with the Principles of the Kingdom of God. Communism and Materialism are challenging us; a practical application of the Kingdom of God is the only adequate response to that challenge. The Call of the hour is that we be imbued with a Passion not merely to acquire wealth for ourselves, which at best we shall have to quit with this mortal coil, but to live and to help others to live in the full enjoyment of the material plenty of the Father's household, to develop all the beauties and wonders of Culture that are open to us, and to share the highest Mysteries and Eternal Realities of the Spiritual Realm. I know of no better Way Out of our present crisis than that we should all be stirred to the very depths of our emotional and intellectual life by this Great Vision and Inspiration of the Kingdom of God.

Man's Best Friend.

(Mrs. L. Willans, Bruce)

The best friend a man has in these hard times is that "Mother of Prosperity"—the Cow.

A man's sons and daughters may lose hold on that God of their Idollatry, a job. Perhaps the wolf that used to stand before the door, now with a broad grin on his face has one eye up to the keyhole; but while he has his cow, the old man shall not want.

The money a man gets for his wheat would need to be elastic to pay for string enough to wrap up the bundles and stretch around the grocer's bills for grub, to feed the hearty appetites of those who pound out the wheat and free it from straw and chaff.

Truly, folks worship at the shrine of the Golden Grain when the sun of prosperity shines over all. But when the cold, grisly hand of adversity stretches out, they prostrate themselves before the "Golden (Heifer) Calf."

The one liberal and unselfish provider in this cold, cruel world: the one who creates from the grass of the field a nectar fit for the Gods; who vies with the wisest of Solomon when she shows how to take a having; when she shows how to take nothing from man and give all; is the cow.

A man's cow that is insurance against times of need, during the glory of prosperity, becomes a paid up policy when poverty stares him in the face. She is the poor man's companion. She will endure the driving snow and chill wintry blast. And in times of stress, having cleaned up the last Wheat-straw, will wait for the roof of an old straw barn; and still add her mite to the population when the snows melt away. Green grass is her delight and water as free as air. She cares nothing for riches and reputation. Four stomachs be filled give her no time to develop the hobby of worrying.

And in the end, when her path is run, as suggested in an old German proverb, unlike an old man "sans eyes, sans teeth, sans taste, sans everything; she bequeaths to man, meat, leather and finally glue, her usefulness not ending in death.

ESTIMATING AMOUNT OF HAY STACK

Reports from different parts of the Province indicate that hay cutting has either started or will do so very soon. No doubt many of these people will be interested in learning the tonnage of their stacks which may be estimated as follows:

An accurate way of determining the amount of hay in a stack, but there are a number of ways of estimating it. The various methods employed seek as accurately as possible to arrive at the number of cubic feet in the stack, then to divide this figure by the number of cubic feet per ton. First find the length of the stack, then the width, for the third dimension measures the distance over the stack from the ground on one side to the ground on the other by throwing a rope over the stack. With these three measurements multiplied together the approximate number of cubic feet in the stack will be found by dividing one-third or one-quarter. If the stack is so built that it slants toward the top front close to the bottom of the stack, one-fourth of the product is taken; if the stack goes over perpendicular or straight for about half its height and then slopes toward the top, one-third of the product is taken.

TIME

All men are born unequal. The equality of humans is limited to one thing—time. The Prince of Wales and the tramp asleep on the park bench both have Twenty-four hours to use each day, no more and no less.

Every man has so many years to live—some a few more than others—but when the end approaches the machine wears out, and neither power nor wealth can reach a year.

The only equality is equality of time—time to work, time to struggle, time to achieve.

No one will be held accountable for not becoming a millionaire, but he is accountable for not making the best use possible of his time.

Benjamin Franklin used the years of his life so well that from a humble beginning he rose to be one of the wealthiest and wisest men of his age. He aptly defined time as "the staff of life."

A man's fortune depends on how he invests his money; his character on how he invests his time.

—Dr. Frank Crane.

"You must have a very enthusiastic cook here," remarked a travelling man at a hotel in London. "How so?" asked the landlord. "Well, she puts everything into the hash," he replied.

VIKING

Signs that the town is growing in a very substantial way are evident. W. J. Brown is building a new garage and service station on 2nd Ave., alterations and improvements to the Viking Flour Mill are being made; the work on the new Lutheran church is progressing and will be a decided credit to the congregation; the Collier Block is being renovated to include R. A. Zerber's jewelry establishment; work was commenced on Tuesday to clear the lots on Main street and 1st avenue on which the former Viking garage was situated. These premises will be occupied by C. A. Dure as a service and gasoline and oil station. Another new building on Main street, one door north of the A.P.P. Barracks, is now under construction, which will be used as law offices by S. Lefaur. Other minor repairs and alterations besides grading of roads and street means considerable. In improvements in town this summer.

The rural school field day held at Lake Thomas on Friday, July 3rd in which six schools completed proved very successful. As the first of the kind in this community it was entered into with a great deal of enthusiasm by the children and was capably planned and managed by the teachers of the schools competing and the members of the Swastika Club. A great deal of the success of the day is attributed to Mr. Evan Jones who very capably acted as sports announcer. There was keen competition in all the races and from their results a number of the children have shown promise of being the best of athletes. The soft ball and basketball games were very interesting and keenly contested. Mr. Jack Sinclair's services as basketball referee were very much appreciated and also all those who kindly refereed the soft ball.

Mooreville school winning the highest points at the sports were declared the winners and were presented the Swastika Shield by Mr. Edward Cox, president of the Swastika Club. In his presentation speech Mr. Cox expressed his satisfaction of the fine spirit that was shown in the sports and hoped that this first field day would be only the beginning of bigger and better rural field sports, for which the proper spirit of sport will inevitably be developed in all children competing.

On account of rain and wet roads, the Viking sports billed for July 1st had to be postponed. The central committee met on Thursday evening and decided to hold the sports on Wednesday, July 15th. Practically the same program of sports and events will take place as billed for July 1st.

It is hoped that the weather will be settled by that time and that as large a crowd will turn out as undoubtedly would have been in attendance on dominion day.

While tossing a basketball with a companion, little Jackie Green, son of Mr. and Mrs. G. W. Green, stepped into a hole at the sports grounds near Lake Thomas on Friday, with the result that he wounded his leg, sustaining a spiral fracture. He was taken to the hospital where Dr. Haworth gave medical attention and set the fractured bone. He is doing very nicely since the accident.

Mr. and Mrs. Ian Dickson and children, were guests at the home of Mr. and Mrs. Jas. Lawes, north of town last week. They motored up from Winnipeg where they reside. Ian Dickson resided on a farm north of town until about twelve years ago when he left for Winnipeg together with his mother. He renewed acquaintances with many of the friends of those days while here.

Mr. and Mrs. J. Bremner, of Detroit, Michigan, arrived Monday evening for a two weeks visit at the home of Mrs. Bremner's mother, Mrs. M. Harris, ten miles southeast of town. Cutting down the hill east of town began last week with a Mr. Nelson in charge. The hill will be cut down considerably and a good grade built. This will eliminate the diversion of the main highway around the hill.

Mrs. A. L. MacDonald left last week for Keewatin, Ontario, where she will spend the summer months with her sister, Mrs. A. J. Holmes.

Mr. and Mrs. Robt. Burns are up from Turner Valley for a visit at the home of Mrs. Burn's parents, Mr. and Mrs. R. V. Hickson and son Billy arrived from Edmonton on Saturday to spend a few days at the Mrs. M. Harris home, south of town.

A report was received at this office on Tuesday from the Wheat Pool that a meeting is being held on Monday, July 13th to decide the future policy of the pool. After the meeting an announcement will be made as to the system to be followed.

There is still room for registrations at the Boys and Girls Camps at Camp Lake, where the boys will swim, row a boat, and take in a real life program for seven days. Registration with Rev. J. W. Bainbridge, Viking.

The Wastebasket

While a travelling man waited impatiently in a restaurant at Jarro last week the waiter was taking the orders of a bunch of flaggers lined up along the counter calling for ice cream sundaes. Finally the waiter noticing the man sitting at the table, asked: "Have you been waited on, sir?" "Just marry him, my dear, I am," "I'm waiting for the sundae school to end."

"My fiancé is spending too much money on flowers, candy and such things," declared a local girl to an experienced married woman here. "How can I get him to be more saving?" "Just marry him, my dear, and you will have no trouble in that respect," was the reply.

"Well, well, you're looking much better," said a doctor at Vegreville when calling on a patient there, "I suppose you followed my instructions to eat say, when a three-year-old child would eat?" "Yes, doctor," the patient replied, "I've eaten mud, coal dust, a button hook, and a lot of matches."

The ladies organization for betterment of everybody's business met in a neighboring town last week. "Do you intend to do your Christmas shopping early?" asked the chairman, to open the discussion. "Yes, I always intend to," responded the ladies in chorus.

"So he is slow pay?" remarked one business man of another here concerning a local citizen. "He is so slow that I think he must be the fellow that put 'stall' in installment," the other replied.

"How are you getting along with golf?" asked a friend of a Kinsella citizen who started to play the game last week. "Pretty well," he replied, "but when I was instructed to address the ball I couldn't think of a word to say."

AN IMPORTANT WARNING AGAINST CUTWORM PEST

Already the cutworm has down considerable damage in large areas in Saskatchewan and in Alberta. If the farmers had taken the warning a year ago of guarding against this pest for this year's crop, no doubt considerable saving of wheat would have been effected. The damage to the 1932 crop will depend absolutely and solely upon the way the fields are handled.

The moth of the cutworm flies across the fields and lays its eggs, starting in the first few days of August, reaching its maximum in the middle of September. This moth will lay all night long and has laid even a very light crust formed upon it by rain, but will lay its eggs upon any soil where this crust has been broken, however slightly. To avoid cutworm damage on a field, therefore, it is necessary that on summer-fallow fields all work should stop by the first of August or a very few days afterwards. Then a very slight rain will form a crust on these fields, which will render them immune the following year from cutworm damage. It is important that no horses or stock or implements or wagons shall be allowed to cross any summer-fallow prepared in this fashion, because wherever the crust is broken by animals or implements, there the moth will lay its eggs, and considerable damage will be experienced the following year. On fields in crop, where harvesting operations are conducted before the 1st of September, then damage the following year is almost certain to be experienced unless these fields are summer-fallowed.

It is apparent, therefore, that all fields which are cropped this year, as far as possible, should be summer-fallowed in the year 1932 and that in addition all work on summer-fallow fields this year should cease as soon as August 1st as possible, and that nothing should be allowed to walk over or cross these fields.

H. L. Seaman, Dominion Entomologist stationed at Lethbridge Laboratory, without hesitation states that it is far better to allow weeds to grow on the summer fallow after August 1st in these affected areas, rather than to disturb the crust of the soil and so invite cutworm damage.

Also, Mr. K. M. King, of the Dominion department of entomology, strongly urges the farmers to take precaution against cutworms as outlined above and goes further in saying that infestation of one cutworm to the square foot can clean off all the crops. Which only goes to prove the damage done by this pest and the necessity of every farmer taking this warning as a guard against a similar pest in 1932.

Avondale.

Avondale Junior U. F. A. met at the home of the supervisor on July 3rd with a large attendance of members and Miss D. Dunbar and Mrs. G. Whitley as welcome visitors. The Juniors are contemplating putting on a concert before school starts again if arrangements can be made and parts learned. Work for the Red Cross and Crippled Children's hospital has been received and the girls hope to get a nice parcel ready before Christmas. Over 30 girls are enrolled. Misses Beatrice Hudson and Cynthia Nottingham acted as hostesses serving a delicious lunch. The next meeting will be on July 14th at Avon-
glen School. Will all members make a special meeting for concert work and distribution of parts not given out at the last meeting. The following paper was given at the opening of the last meeting by the supervisor.

Dear Girls:
Some of you are reaching the age when you will largely have to select and adopt for yourselves the habits which will control your future lives, as every one of us is a creature of habits, both physical and mental that we acquired in our youth and which actually constitute a part of our being. It is wonderful what a girl can do in the way of acquiring habits which will strengthen and develop both her body and mind if she sets her heart upon doing so. It is also sad to see how easily she can, without intending to do so, unconsciously form those which will weaken both so as to make a failure of her life.

Roosevelt was a sickly little boy, but he made himself a strong healthy man. His eyesight was defective but he made himself a great hunter of dangerous game and familiar with the appearance and habits of every kind of animal, bird and plant life. He had a poor voice but he made himself a great speaker. It has been said of him that thru incessant reading and what is more important, by reflection upon what he had read, he developed his memory so that he knew more about more things than anyone else in the world, and finally grew from an unknown young man to make himself recognised throughout the world as the greatest American of his age.

Girls should early in life acquire habits of exercise and a love for athletics and outdoor sports. But they must also acquire habits of persistency and dogged application when making a study of all branches of education. Accustom yourselves to long walks, jumping and running, being careful however, not to overdo. Play tennis, base and basket ball and other competitive games which will tend to develop alertness of the body and team work rather than more strength whenever opportunity affords a chance. When you reach womanhood and become engaged in your life work do not neglect your athletics, they are much better and cheaper than physicians. In your exercises and games you must remember that while they are enjoyable their real value is to keep you healthy and strong so as to fit you for doing your life's work, but you must not permit them to absorb your time or thoughts to the extent that they will interfere with your work. In other words play hard but also work hard.

Keep in mind always that you must be a straight forward honorable girl and despise anything that is untruthful or dishonest. This is what makes character, and character is the most important thing in life. It is what your life has caused the world to believe that you really are. Always remember that all you have and are is owing to the tender care of your parents and that it would be the greatest possible ingratitude if you did not try to return it by being a dutiful, obedient, and affectionate daughter. Always treat with respect elderly and particularly old people. They may not be as familiar as you are with the latest and modern ideas but their years have given them greater experience in life and that is the thing that really counts as human nature has not materially changed since King Solomon compiled his Proverbs.

Not only in your sports but in every thing you do follow the maxim to "Play the game for all that you are worth, but strictly according to the rules. Keep in mind that if one violates a rule in any game and wins, they did not win the prize, but still it and every time they look upon it they must feel ashamed. Don't ever indulge in such a mean thing.

Train yourself not to be afraid. I do not mean of physical danger alone, altho' just that is good and important to acquire but, not to be afraid to tell the truth, even though its results may be unpleasant to you. Not to be afraid to discipline yourself, even if they be poor, your race, your religion, etc. Be yourself at all times to do anything else deceives

Review of Parliament

(By Thomas Wrayling)

Ottawa—Pity the poor reporter. All his life city editors tread on his tail and from his youth up train him in accuracy. Then he is sent to report a political meeting. The politician says something; the reporter writes it down. Somebody calls the politicians bluff; and—"he was misreported."

This game of blaming the reporter has broken out afresh in recent months. Today C. W. Bell (Cons. Hamilton) blamed the reporter for being incorrect in certain statements and Hon. J. D. Chaplin took the same easy avenue of escape. "Parlor, Bedroom and Bath" but since writing it he appears to have lost his sense of humor. In one speech he said he had been misreported on one statement and the next minute claims to remember that a certain member laughed at a certain incident five years ago. What a memory?

M.P.'s and senators are good sorts generally. They fraternize and they chaff each other about their follies. This happened not long ago when Hon. James Macdonald and Hon. Charles Stewart (Liberals) met Mr. Bell in the Chateau. The government had put absurdly high tariffs on glass and later had to cancel them. The Liberals chaffed Mr. Bell about this. Six months later Mr. Bell was unparliamentarily enough to use this friendly backtalk as a sinister statement by the two ex-ministers and so bring them into disrepute.

The matter was thrashed out in the House Monday, and Mr. Bell blamed "art of the story on the reporter. Then F. J. Sanderson (Lib.) quoted another of Mr. Bell's recent speeches to the effect that Mr. Sanderson and M. F. Hepburn (Lib.) had laughed at the end state of the workless in Hamilton five years ago. Mr. Sanderson, not having the infallible memory of Mr. Bell, couldn't remember the incident but pointed out that at that time Mr. Hepburn was not even a member of the House. The laugh was against Mr. Bell.

Mr. Chaplin was reported by the newspapers as having said that if the government passed the Australian treaty he would not stand for it, he would leave the party. On Monday he too took the easiest way out and said he was wrongly reported. If there was a reporter's union at this time, they would be insisting on dictation records of all speeches by politicians.

It is very hot in Ottawa just now. The Capital lies amidst lakes and rivers and when it is hot its very hot, in fact it is a torrid. Prime Ministers from Sir Wilfrid Laurier on have tried to hold winter sessions but no matter whether the House meets in November or February, the members dawdle on until the hot wave strikes; then they move. It is likely now that the House will prorogue about July 15th; unless there is a blockade on the unemployment question.

Such a blockade is not unlikely. The situation throughout Canada grows daily more serious and this winter will be the worst in a great many years. Yet the government has brought down no policy to relieve unemployment or aid agriculture; two vital essentials if there is not to be real trouble this winter. Hon. Gideon Robertson has returned from the west, but his western statements were all optimistic, and it is felt that optimism is misplaced. The Opposition may therefore insist that parliament remain in session until the government declares its policy and votes the necessary money for relief and aid.

There was a debate this week on the new Tariff Board. The chief objection to the new board is that it is

very few and excites both ridicule and contempt.

Ever strive to help someone less fortunate than yourself and let us all do our best to be pals to the members of our Junior Local, trying ever to bring ourselves to the standard we would like all others to be.

If we can do this we will be able to build up such a Junior U.F.A. that it will be a credit to our organization and our community—for in Unity there is strength to conquer all obstacles.

Mrs. R. L. Shotts' daughters Margaret and Doris spent the last week at Vegreville taking in the Chataqua and visiting Mrs. Shotts' brother and family the Riddells.

Miss Orrill Fischer is continuing at Avonlea the coming year as teacher. Doris Anderson, daughter of Mrs. S. S. Thomson underwent an operation for appendicitis at an Edmonton hospital Friday morning. Mrs. Thomson and little Shirley accompanied her to Edmonton last reports Doris was as well as could be expected.

Hudson Bay Co. moved a house to the Young farm last week. Mr. Young had previously lost his house by fire.

Monte New has purchased the S.W. Quarter of 35-46-8-wth.

a padlock on the stable after the horse has been stolen. The Prime Minister has boasted every tariff in the list, though Hon. Dr. Manion states the present high tariff is only a moderately high tariff. Having put on great increases in protection Mr. Bennett is now to appoint a tariff board. Had he appointed it before the tariff increases parliament could justifiably ask the increases be first considered by the Board. That is Mr. Mackenzie King's view.

There is much opposition to the government's proposal that the Board be statutory with appointments made for ten years. That means saddling any succeeding government with protectionist commissioners not in line with their policy. Normally a new government could fire the old board by repealing the act, but Mr. Bennett knows that before long the Conservatives will again have a majority in the Senate and could block any repeal. It is not a very sporting proposal.

The members are very busy in committees for in addition to the ordinary committee there is now the special Beauchamp committee as well as the usual Canadian National Railway committee.

When Sir Henry Thornton comes to face a parliamentary committee he brings about a score of experts and if M.P.'s were as thoroughly posted on other things as upon the Canadian National the country's business would go ahead much faster. The other day the committee room was crowded. The chairman, Hon. J. D. Chaplin came in late, hurried to the head table and opened the proceedings. Then he discovered there was not a single member of the committee present but himself. The crowd included railway experts, newspapermen and others.

There was a great storm in parliament over the report of the royal commission on grain futures, headed by Sir Josiah Stamp. Somebody slipped a joker into the report. It was rather serious joker, tending to show that out of 1084 days the farmer selling through the wheat pool got the lowest prices except on 22 days as compared with the open market price. There was a chart to prove it. The chart was inaccurate, and so was a serious piece of anti-pool propaganda. Everybody in the government dodged from under and nobody could be found to accept responsibility for the appearance of the chart in the report. The government was apologetic but admits it has taken no steps to counteract the effect of the spurious chart. Estimates are being fairly rapidly dealt with but the House has not yet got the Tax Budget resolutions. These must all be taken piecemeal, and there will be interesting debates on the more important items.

SHIPPERS FIND TRUCKING HOGS EXPENSIVE

Two shippers from Ferintosh, Alta. trucked eight hogs each to Edmonton and when the returns were made to them, the Buffalo Lake Association also figured what they would have brought if delivered to Ferintosh and shipped by rail to market. One shipper would have netted \$12.40 more for his hogs and the other \$12.20, according to the U.F.A., or an excess marketing cost of approximately \$1.50 per hog made up in trucking charge and 25 cents per cwt. discount which deducted from all hogs trucked to the yards.

Something to worry about—only 25 per cent of dandelion seeds are fertile and will grow.

(By Gee)

S. J. Latta

FOR many years, commercial art, advertising and newspaper work have provided favorite fields of activity for S. J. Latta, who is in charge of publicity for the World's Grain Exhibition and Conference to be held at Regina in 1932.

Born in London, Ontario, in a family many of whom were connected in some way with newspapers and reared on a hundred acre farm in Huron County, Mr. Latta enjoyed the usual educational facilities of his native Province. After public school, collegiate at Clinton, London and St. Mary's, and Normal School at Ottawa, Mr. Latta taught school for a number of years, most of which time as principal of Old Colborne Street in his native city.

The lure of the West brought Mr. Latta to Saskatchewan in 1905, where he settled on a homestead in what was then known as "The Famous Last Mountain Valley," north of Regina. After arriving in the West, however, he became editor and publisher of two newspapers, one of which he operated for 20 years.

Mr. Latta represented Last Mountain in the Saskatchewan Legislature for a number of years and was a member of the Provincial Government for 13 years, during which time he held the portfolios of highways, education, and provincial secretary.

"Good soil for growing things?"
"Quite good. This was one of last year's hollyhocks."—The Passing show, London, England.

WORLD HAPPENINGS BRIEFLY TOLD

The will of Dr. Horace A. Bashore, a dentist of York, Pennsylvania, provides that all bills due him for dental work be cancelled.

During 1930 Canadians spent \$200,000,000 on alcoholic beverages and \$50,000,000 on cigarettes—more than the annual premiums on the entire amount of life insurance in Canada.

Alfred Aloysius "Trader" Horn, co-author of the book "Trader Horn," died in a hospital at Whitstable, England, after a brief illness. He was 78 years old.

The Vimy Ridge War Memorial will not be ready for unveiling before 1934 or 1935, Hon. D. M. Sutherland, Minister of National Defence, told the House of Commons.

Without any discussion a bill authorizing a loan of \$300,000 to the harbour commissioners of New Westminster, B.C., was given third reading in the House of Commons.

Gerald Egerton Williams, 29, who was shot down while flying over the German lines on the morning of Armistice Day, died at Bournemouth, England, of injuries sustained in an auto accident.

Mahatma Gandhi has been designated by the government to represent the Indian Nationalists on the federal structure committee of the second round table conference, which meets in London, England, September 5.

Recently appointed to the Manitoba and western Ontario command, Royal Canadian Mounted Police, superintendent Richard Field arrived at Winnipeg from Dawson, Y.T. He succeeds Supt. A. B. Allard, who was transferred to the Yukon post.

Glad, fifteen and a half miles southwest of Nelson, across the Kootenay River, and a flag station on the Canadian Pacific Railway on the Nelson-Rossland Branch, may become the new home of the Sons of Freedom, if efforts now being put forward by the province meet with success.

German Steel For Russia
The German Iron and Steel Trust has agreed to deliver to Russia 80,000 tons of bar iron, the same amount of sheet iron and 40,000 tons of steel products in the next two months at unstated prices. The deal was arranged in Berlin by the Russian trade delegation which recently came from Moscow.

Young Mattison has a loud-speaker in his room, and one evening he goes out leaving it on.

Mistress: "I hear sounds in Master Mattison's room. Go and see whom he has in there."

Maid (returning): "There is only the radio there. It is talking to itself."—Kasper, Stockholm.

Demand For Livestock

1,300 Head Of Cattle Purchased By Saskatchewan Farmers Under Government Plan

A marked increase in the demand of Saskatchewan farmers for live stock is indicated in the records of transactions under the Saskatchewan Live Stock Purchase and Sale Act, during the 1930-31 fiscal year, now being compiled by the Live Stock Branch of the Provincial Department of Agriculture. Exclusive of feeder steers which were handled under a different option, approximately 1,300 head of cattle have been purchased by Saskatchewan farmers under the provisions of the Act during the fiscal period referred to, this being the largest number in any year since 1919. In addition, 230 bulls were purchased, the largest number since 1922. British demand for sheep and swine also is noted, the 3,500 ewes purchased being more than in any year since 1918, and the 1,000 sows being four times as many as in any previous year.

Phone Call From England

First 'Phone Conversation By All Canadian Route Between England and Saskatchewan

For the first time in history a direct conversation was recently carried on between England and western Canada when Colonel A. S. Angwin, supervisor of wireless of London, England, called his sister, Mrs. A. G. Stancill, of Lenex, Sask., the call coming via beam wireless to Montreal. The first words to western Canada and thence by telephone to Regina, were spoken by the postmaster-general of England, who stated that this was the first time England had spoken directly to western Canada through an all-Canadian route and inquired as to the reception. The call lasted about ten or twelve minutes, the entire conversation coming over clearly and distinctly.

Edmonton Industries

Some 564 Commodities Now Being Manufactured In Northern City

Some 564 commodities are manufactured in Edmonton, according to the latest figures. Chief among these are: men's clothing, fur garments, women's and children's wear, from steel and sheet metal products, wire fences, shurnets, brooms, biscuits, beverages, lumber, window sashes, doors, boxes, cement, brick, paper cartons, flour, boats, canoes, candies, shoes, cabinets, chairs, auto accessories, signs, packing house products, dairy products, mattresses, neckties, scarifiers, paints, plows, soap, springs, stone, toiletries, aerated waters, wood wool, violins, and vinegar.

Will Use Historic Forum

World's Poultry Congress In Italy Will Have Unique Setting

The historic forum which Trajan built about 115 A.D., will be used to house exhibits for the fifth world's poultry congress in Rome, Italy, next year. Arrangements making this possible have recently been completed with the Mussolini Government, according to advice received at Ottawa by F. C. Elford, Canadian poultry husbandman. The forum, known to-day as the market place of Trajan, was one of the brilliant architectural accomplishments completed during the reign of Emperor Hadrian.

May Consult Canadians

Mexico Would Ask For Advice In Connection With Their National Railways

It was stated in official quarters that General Juan Andreu Almazan, Mexican secretary of communications, who is at the Mayo clinic at Rochester, Minn., would meet Canadian railroad officials in New York City soon for a conference in regard to the Mexican National Railways.

A commission of Canadian experts came to Mexico at the government's request a year and a half ago and made a thorough study of the condition of the Mexican lines.

Demand For Vegetables

The increasing demand for vegetables in the diet is probably largely responsible for the rapid expansion which took place last year in the vegetable canning industry throughout Canada. The increase in 1930 was 64.5 per cent. as compared with 1929. Total production amounted to 10,066,614 cans. — Department of Agriculture, Ottawa.

Post Offices In Canada

Canada has 12,427 post offices, an increase of 18 since last year, and of 180 since 1922, the reply given by Hon. Arthur Sauve, postmaster-general, to a question asked in the House of Commons. Rural mail carriers throughout the country number 4,256.

Recipes For This Week

(By Betty Barclay.)

POOR MAN'S PUDDING FRAPPE

1/2 cup rice.
5 cups milk.
1/2 cup sugar.
1/2 teaspoon salt.
1/2 teaspoon vanilla.
1 cup whipped cream.
1 cup candied ginger.

Wash the rice well, then mix it with the milk, sugar, and salt, pour into a baking pan and place in a very moderate oven, 300 degrees, to bake from two to three hours. Stir frequently for the first hour, then add the vanilla and finish baking without stirring. Chill thoroughly, skim off the crust and fold in the ginger cut in tiny pieces and half the whipped cream. Arrange in sherbet glasses, topping each with a rosette of whipped cream and a bit of candied ginger. Chill almost to freezing before serving.

DINNER PUNCH

(Serves 4-6)

Juice of 2 lemons.
1/2 Juice of 1 grapefruit.
2 cups water.
Sugar or honey to-taste.
Mix thoroughly.

For Variation: Add to the above mixture 1 cup of the juice of another fruit, such as grape juice, raspberry juice, logberry juice, pineapple juice, elder or the juice from any canned fruit.

Or add 1 cup of a puree made by forcing peaches, pears, apricots, bananas or berries through a potato ricer or coarse sieve.

A Popular Service

Growing Demand Is Shown For Government Graded Beef

There could be no better indication of the rapidly growing popularity of the Beef Grading Service of the Dominion Department of Agriculture than the increase of over 70 per cent. in the volume of beef graded for sale throughout Canada between April and May of this year. Only a little over a year in operation the Beef Grading Service graded and branded a total of 1,199,357 pounds of "red" and "blue" brand beef in April last. In May this total raised to 1,983,022 view recently advanced by Prof. Albert Einstein.

Natives of French Morocco prefer movies of the Wild West type.

A modern ocean liner costs about \$30,000,000.

Sea Safer Than Land

Statistics Show Sea Made Safer, But Peril To Life On Land Is Increasing

Curious how a legend, especially when it is born and nurtured by fear, survives demonstrated fact. There is the legend of the "Peril Of The Sea," of the danger of the sea. Ships have become bigger and safer, shipwrecks fewer and far between, loss of life at sea quite rare. Yet while the sea is being made safe, and the peril of life on land has been rising from year to year, people remain as unconscious of one movement as of the other. They still regard the sea as a place of peril.

Interesting statistics, bearing on this point, appear in the Shipping World. In 1895-1899, the average annual total losses of British ships were approximately 450 ships or about 175,000 tons, and the average loss of life in British ships was over 1,000 persons per annum. In 1924-1928, the corresponding figures were 175 ships or about 95,000 tons, and the loss of life about 220 persons per annum.

The story of these statistics, of course, is the work of wireless, of bigger and better ships, of better weather reports, of a general world movement for promoting safety at sea. On the other hand, while we have been doing these things, cutting down on the toll of the deep, we have been devising machines with a most extraordinary ingenuity to make existence on land a hazard. Yet nobody seems to be overly exercised about the latter.—New York World.

Aid For Blind Needed

Duty Rests On Government Opinion Of P. E. Layton

Not from one charitable organization or the combined facilities of all institutions in the country, but from the state, must come aid for the sightless members of the community, declared P. E. Layton, president and founder of the Canadian Federation of the Blind.

"We have been told that now is not the time to ask governments for pensions. Why not?" Mr. Layton asked. He addressed the fourth conference of the federation at Montreal, welcoming delegates from all sections of Canada, from Halifax to Vancouver.

Young Trees Distributed

From 1901 to 1930 over 116,000,000 young trees have been sent free to over 100,000 applicants living in the Prairie Provinces—Manitoba, Saskatchewan and Alberta—by the Canadian Government Forest Service of the Department of the Interior. Last year more than 6,000,000 tree seedlings and cuttings were shipped.

That the sun's surface is hotter at the poles than at the equator is a view recently advanced by Prof. Albert Einstein.

Natives of French Morocco prefer movies of the Wild West type.

A modern ocean liner costs about \$30,000,000.

Keep Free From Fat—Feel Younger

Unlike most salts, Kruschen isn't simply a laxative—if that's all you want, you can get it with any kind of a label will do—but it is that all you want?

When you take Kruschen Salts you not only stimulate your bowels, liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with nature's own revitalizing and rejuvenating minerals.

Get a bottle of Kruschen Salts at any drug store—take one-half teaspoon in a glass of hot water every morning before breakfast—cut down on sweets and fat forming foods and get some moderate regular exercise—in just a few days indolence changes to activity and life grows brighter.

A Virginia woman writes: "I just started on my second bottle of Kruschen Salts and have been losing flesh right along—you have fathomed the secret of flesh reduction."

The Northern Seaport

Plans For the Development Of the Townsite Of Churchill

Plans for the development of the townsite of Churchill, seaport of northern Manitoba and terminals of the Hudson Bay Railway, call for the construction of a modern town, with central heating, fireproof public building and semi-fireproof residences, boulevards, parks and squares.

Constructed under a town planning system, approved of by Hon. Donald G. McKenzie, Provincial Minister of Mines and Natural Resources, every facility of a modern town will be provided. The townsite will be ready for settlement next year. No property will be sold, but it will be disposed of in 50-year leases, subject to revision every five years.

Churchill will be blessed with wide streets for thorough traffic, protected residential districts and generous space for recreation. All streets, parks and squares will be named after early explorers and heroes of Canadian history.

Good Poultry Record

Performance Of B.C. University Rhode Island Reds Is Attracting Attention

Professor E. A. Lloyd, head of the poultry department of the University of British Columbia, states that the members of the University's family of Rhode Island Reds have already averaged over 100 eggs in their second year and give promise of exceeding an average of 200 before the fall. Such production has never been recorded in any strain or breed anywhere in the world, he said. There are eight birds in the family.

Glady's—After I'd sung my encore I heard a gentleman from one of the papers call "Fine! Fine!"

Harry—Goodness! And did you have to pay it?

Hugo Grotius, the great Dutch scholar of his day, had a good law practice at 17 and was attorney-general at 24.

Wheat Grading By Artificial Light

Would Eliminate Expensive Delays
Caused By Dull Weather

Because of the vagaries of old soil and the differences in the quality of natural illumination which he sends down on western Canada, between Port William and Vancouver, scientists in the National Research Laboratories at Ottawa, have been seeking an artificial substitute for natural light to be used in grading Canada's grain crop. In a report just prepared by Dr. D. C. Rose, on the experiments conducted, it is stated that "without doubt artificial lighting can be used in a satisfactory manner."

Lighting units devised in the Ottawa Laboratories are now being tested in the inspection office at Winnipeg. If they are found practicable it is believed that differences in grading between inspection offices will be reduced to a minimum and expensive delays caused by dull weather eliminated. It will be possible to grade grain throughout the twenty-four hours of the day.

"One of the main objections," says Dr. Rose, "and probably the only real objection to it, is psychological. Many individuals who are used to outdoor life and working under natural light find some discomfort in working in closed rooms using artificial light. A grain inspector's training with natural light has been so long and rigorous that a sudden change may cause real or imagined discomfort. This should be overcome to a large extent by keeping the inspection room as pleasant as possible, well and uniformly illuminated, well ventilated and, of course, at comfortable temperatures. Quite likely a considerable preference for artificial light would develop in inspectors who used it for some time. Many individuals who do a great deal of close work much prefer artificial light to daylight owing to its greater steadiness and the ease in locating the light where it is wanted."

Inspectors of the Board of Grain Commissioners at the various inspection offices compare thousands of samples of grain with standard grades established each grain year. Every carload and every shipload is graded.

Strength Of British Navy

Submarine Menace and Convoy Weakened Effectiveness Towards End Of Hostilities

That the British fleet towards the end of the Great War was so busy fighting the submarine menace, so occupied in providing convoys, that it was doubtful whether it could then meet the German high seas fleet even on terms of equality, is one of the arresting statements in the final volume of the official history of naval operations of the Great War, published recently.

The assertion came from Admiral of the Fleet, Earl Beatty, towards the close of the war, Earl Beatty told the naval conference it was no longer desirable to provoke a fleet action such as the Battle of Jutland, even if the opportunity occurred. Such large contingents of the British naval forces were absorbed in the anti-submarine campaign. Earl Beatty told the naval chiefs, that he could no longer be certain of meeting the German fleet even on terms of equality, much less of superiority on the British side.

Sir Henry Newbolt, official naval historian, who wrote the final volume and completed the work begun by the late Sir Julian Corbett, is convinced, however, the navy's convoy system won the war at sea.

Seek Tropical Valley

Party From Philadelphia To Search
For Hidden Valley In Northern
British Columbia

A search for hidden tropical valleys in the mountainous region of northern British Columbia, where rare biological and botanical specimens are believed to exist, is the object of an expedition headed by Dr. J. Norman Henry, who recently left Philadelphia for Canada.

The members of the expedition include Dr. and Mrs. Henry, H. G. McCusker, Canadian Government topographer, who has been loaned to the party to chart the region, about which very little is known; and Dr. Benjamin H. Chambliss, who will act as physician.

Travelling first to the Peace River country in northern Alberta, and then into the Peace River block in British Columbia to Fort St. John, the party will join 11 guides, headed by Stanley Clary, outfitter, of Entrance, Alberta, their pack train of 80 horses, and start on a 35-day trek northward to the confluence of the Tood and Liard Rivers.

Work Ahead Of Schedule

Elevator At Churchill Will Be Ready
For First Grain Shipment

Construction of the 2,500,000 bushel elevator at Churchill, is ahead of schedule and there is no doubt that it will be all equipped and ready to handle the first shipment of grain out over the Hudson Bay line and by Hudson Bay by September 15, C. D. Howe, designer of the elevator, said upon his return to The Pas from Churchill.

Mr. Howe, who is head of C. B. Howe and Company of Port Arthur, one of the leading elevator architectural companies on the continent, designed the elevator that is rearing its walls skyward along the bay coast lines.

For Biological Purposes

Several Thousand Live Toads Shipped
From China and Japan

Toad farmers of China and Japan, making another of their periodical contributions to the advancement of western science, are responsible for a shipment of several thousand live toads which recently arrived at Vancouver, B.C. The reptiles will be used in medical schools and laboratories for biological purposes. Enclosed in ventilated boxes partly filled with earth, the toads are capable of making the 7,000 mile journey without feeding, though they are watered frequently throughout the trip.

Report Is Denied

Regina-Saskatoon Edmonton Air Mail
Not To Be Discontinued

Officials of the post office department denied reports that the Regina-Saskatoon-Edmonton branch of the western air mail route was to be discontinued after July 15. It was pointed out that this story, similar to one some time ago saying all the mail services were to be discontinued, was apparently based on the cancelling of the present air mail contracts in order to give the government an opportunity to review the situation. These contracts terminate at different dates, it was explained.

Wanted To Help

The husband drew up a chair beside his wife's sewing machine the other day and remarked: "Don't you think it's running too fast? Look out, you'll see the wrong seam. Slow down, or you'll stick that needle in your finger!"

"Why, what's the matter with you? I've been running this machine for ten years."

"Oh, I was merely trying to assist you, just as you try to help me drive the car."

Oldest Foreign Patent

The oldest foreign patent of which there is a complete record is that for a pump granted to Galileo, the great Italian scientist and philosopher, while he was professor of Padua. He applied for this patent in December, 1593.

A writer declares that every single man makes a false step sooner or later. Therefore, of course, he is known as a married man, says the Montreal Star.

Nothing great was ever achieved without enthusiasm.

Professor Finds Cure For Bone Infections

Larvae Of Green Bottle Fly Has
Remarkable Healing Properties

Physicians attending the 32nd annual session of the American Medical Association, at Philadelphia, were told that the larvae of the common green bottle fly has remarkable healing properties for bone infections.

Credit for this discovery, said to be one of the most thrilling in the annals of medical history, is given to the late Dr. William S. Baer, formerly clinical professor of orthopedic surgery at John Hopkins.

Realization that flies have a definite place of usefulness in medical science can be traced back to a shell hole on the western front during the World War.

After a week of heavy bombardment by German artillery, Dr. Baer, who was attached to an American medical unit, brought two wounded infantrymen to an advanced station.

Both men had lain in mud for seven days and their shattered legs were infested with maggots.

The two men were placed in a ward with other wounded men, and, despite the presence of the maggots, it was noted that their wounds healed faster than those of other patients.

Dr. Baer wondered, and when he returned to civilian life he made an intensive study of maggots and decided to try them in the wounds of children suffering from bone infections.

Some of the cases had been operated upon, yet it was noted that immediately after the injection almost unbelievable cures were effected.

Tinned Hams From Denmark

Danish Methods Of Marketing Sets
Mark That Is Hard To Beat

There is food for thought for the Canadian farmer in the recent arrival in the Canadian market of "tinned hams" from Denmark. When it comes to marketing its production, or overproduction if you prefer, the little kingdom of Denmark sets a pace which is hard to beat. Not only do they market their product in all the usual forms, maintaining the dominant position in the British market, but they are now processing their cuts, packaging them attractively, and making a strong bid for the larger consuming centres in our own Canadian market. Canadian farmers should find an incentive to opportunity in the situation. A study of the fundamental principles underlying Danish methods might hold much of useful interest.

Suit Made In Record Time

Shear Sheep and Finish Suit In Three
Hours and 22 Minutes

In response to a challenge made by Sir Malcolm Campbell in a speech before the Bradford Rotary Club recently, a Yorkshire manufacturing firm and a Leeds tailoring firm have broken the time record in producing a suit of clothes.

Starting with the shearing of a sheep the suit was finished in three hours and 22 minutes. The previous record set in the United States in 1898 was six hours and five minutes. The suit was made to fit Rt. Hon. J. H. Thomas, secretary for the Dominion, who agreed to wear it at the Imperial Industries Fair, at Bradford, next month and later at the Imperial Economic Conference.

Couldn't Chance It

A man went to his doctor and requested treatment for his ankle. After a careful examination, the doctor inquired:

"How long have you been going about like this?"

"Two weeks."

"Why man your ankle is broken! How you managed to get around is a marvel. Why didn't you come to me at first?"

"Well, doctor every time I say something is wrong with me, my wife declares I'll have to stop smoking."

Don't worry about the weather. There will be lots more.

CORNS

Lift off - No Pain /

QUICK RELIEF

Just a drop or two of Putnam's on any sore corn and out comes all the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

PUTNAM'S

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets at milligram strength. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

Made in Canada

British Admiralty Gives Credit To Londoner

Invention Of R. H. Davis Saves Lives
Of Men Trapped In Submarine

Six men who escaped from the sunken submarine "Poseidon" apparently owe their lives to the invention of a Londoner, R. H. Davis, who provided them with what is described in effect as a "third lung" resembling a lifebelt with a gas mask attached.

It was designed to enable men trapped in a submarine to breathe freely until they had a chance to escape.

It is twelve months since the apparatus was first served out as part of the equipment of submarine crews, Gorman Davis, the inventor's son, said. "It consists of a breathing bag carried on a man's chest and a buoyancy apparatus. To the bag is attached a cylinder of oxygen and the man inhales and exhales air which is being continually purified in the bag. With one of these bags it is possible for a man to live an appreciable time under water. Goggles are used to protect the eyes."

"If there is life aboard a submarine after she is sunk it is possible with this apparatus to escape to the surface no matter how deep the vessel may be."

"Pressure in one chamber must be raised—usually by flooding—until it equals that outside the ship. Then hatches may be opened and the men escape. Should they be injured or too weak to help themselves much, the apparatus is sufficiently buoyant to carry them safely to the surface and keep them afloat. "Should there be other men alive in the "Poseidon" there still seems a chance that with the escape apparatus they may get free."

The Admiralty confirmed the fact that six men escaped by means of the Davis apparatus.

THE RHYMING OPTIMIST

By Aline Michaelis

MUSIC AND MEMORY

The music weaves its vague enchantment here.

Within the dimness of the lofty room.

Till once again I hear the lark's notes, clear

And high across June meadows sweet with bloom.

I see the white clouds drift and on wide slopes

The arabesques of shadow fleetly pass;

With restless fingertips the sunlight gropes

Among the thrusting emerald blades of grass.

Now memory and music intertwine;

Though summer and the lark fled long ago,

Again loved notes, in these bright dreams of mine,

Go lifting up from flute and piccolo.

How strange, these wandering players have the key

To rooms I thought belonged alone to me!

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with their refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

A Good Fish Story

The season's best fish story comes from Banff Springs, Alberta. A 20-pound trout in Lake Minnewanka, yanked an angler off a pier into the water, but the fisherman held on and with the aid of a police officer and a boat finally landed the prize.

Zoro Agba, the ancient Turk aptly commented on the occasion of his first plane ride that he hadn't been so excited in the last 130 years.

Aeroplane Prospecting

Areas In Northern Saskatchewan Will
Be Investigated

The aeroplane will be employed by Professor J. B. Macdowell of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Areas which would otherwise be accessible only with much difficulty can be readily reached by the aeroplane route. Investigation of areas of schist and greenstone presenting favourable prospects for metallic minerals will be made.

Under instructions from the Provincial Department of Railways, Labour and Industries a survey of coal and clay deposits lying north of the Saskatchewan River is also being conducted by Professor W. G. Worcester of the Ceramics Department of the University of Saskatchewan and Walter Hastings, developing engineer. For some time these deposits have been known to exist but they have never been thoroughly investigated as to their extent, quality or commercial value.

The survey is being made with a view to developing this area. If tests prove that development would be feasible.

Health Of Children Affected

Children Of Unemployed Men In
Montreal Show Effect Of
Malnutrition

The effect of the economic depression on the children of unemployed men has been revealed by the health service of financial federation, conducted by the Child Welfare Association of Montreal. Ninety per cent. of the children, who are being examined at the rate of 200 a week, are underweight. Miss Esther Belth, R.N., director of the Child Welfare Association, stated.

One child was found to weigh 24 pounds less than normal. Lack of nutritious food has also caused dental decay and chills caused by the association are busy doing what they can to halt the rot. A youngster of 13 had to have her entire upper row of teeth extracted, Miss Belth said.

Deportation Question

British Government Has No New
Information On Subject Of
Deportation From Canada

Rt. Hon. J. H. Thomas, secretary for the Dominions, was asked in the British House of Commons whether he had received any reply to the representations he said the British Government would make to the Canadian Government regarding deportation from Canada of British subjects who had become public charges in the Dominion, either because of unemployment or because they were suffering from disease.

The minister replied he was not yet in a position to add anything to his answer of April 21, when he had told the House the government was taking steps to get in touch with the Canadian authorities.

Have Completed Survey

Survey Made Of Proposed Mafeking
Cut-Off In Manitoba

Engineers of the Canadian National Railways have completed a survey of the proposed Mafeking cut-off in Manitoba, and have made a report to the minister of railways and canals, Sir Henry Thornton, president of the National road, told a special parliamentary committee dealing with railway finances. Hon. R. J. Manion, the minister, said he had not seen the report, nor was he aware of its recommendations, because it had been received by his department only a short time ago.

Operated On Himself

Internes At Philadelphia Successfully
Removed One Of His Tonils

An interne at Philadelphia, Pa., attempted to contribute to scientific fields by removing his own tonsils, it has just been disclosed. Dr. Charles T. Meacham, of Petersburg, Va., a graduate of the University of Pennsylvania a year ago, succeeded in removing one of the tonsils and almost had the other one out when he became ill. Mirrors, a disc on his forehead and one on the wall, were used.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

The interrogation point was designed from the shape of the human ear. It is quite futile to ask questions unless we lend an attentive ear to the answer.

Phosphorus under water is practically indestructible.

Little Helps For This Week

"Whoever will be great among you, shall be your minister; and whoever of you will be the chiefest, shall be servant of all. For even the Son of Man came not to be ministered unto, but to minister."—Mark x. 43-45.

What time we nurse our discontent Rather instead should we recall How once in servant's guise He went, Who was Master of us all.

Nor any work, whereby was wrought The Father's will, too irksome thought. Need any be disquieted?

Whose heart thus memory inclose? Who follows where the Lord hath led; What matter is it where He goes; For working with Him, aside by side, The meaneast task is glorified.

—Mary Bradley.

We cannot be too little to be like Him, nor so great as to work outside of Him."—Adeline D. T. Whitney.

Terrorists Are Sentenced

Mafia Terrorists In Italy Face Sentences Totalling 15 Centuries

One hundred and fourteen notorious Mafia terrorists face sentences totalling 15 centuries as a result of their conviction at a trial in Italy lasting almost a year.

Thirteen of the defendants got life, 10 got sentences of 15 to 25 years, 16 will be imprisoned ten to 15 years, and 69 will go to jail for one year. Fifty-seven others were acquitted.

The charges against the prisoners included 43 murders, 26 attempted murders, and many cases of assault, extortion, blackmail, shooting, robbery and bribery.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-like in texture. Truly a peerless toilet requisite for every discerning woman.

Saskatchewan Cattle Shipments

One hundred head of Saskatchewan cattle went forward to the British markets the other day, 30 of which were taken from a feed lot within half a mile of Saskatoon. This is the first of several weekly shipments that will be made by the Saskatchewan Co-operative Livestock Producers Limited.

Took Pinkham's

Medicines

"I was always tired and I had severe pain at my periods. Lydia E. Pinkham's Vegetable Compound helped me. I took it before my two children were born and I am taking it now at the Change. I have also used Lydia E. Pinkham's Sanative Wash and found it a great relief for inflammation and for a discharge which bothered me."

—Mrs. Caroline Dorey, 196 Head St., Simcoe, Ontario.

Bruce News.

The July meeting of the Bruce Women's Institute was held in the Bruce Hall on July 2nd. Owing to the absence of the president, the vice-president Mrs. R. L. Farlinger was in charge.

Owing to bad roads, and because some of the members were just getting over the effects of a disastrous 1st of July, only ten ladies were present. However, big meetings are not always the best meetings, and those present had a wonderful time. The ladies wrestled with a bale of wool that had to be carded for the quilt nearing completion. The more the wool was pulled apart the greater became its bulk, until the club room looked like the aftermath of a pillow fight with standing room only.

As usual the members had to:

Sing a song,
Say a line,
or Pay a dime.

The proceeds going toward paying

for fruit and flowers for those under the weather. Dimes were apparently scarce, for everybody performed, except one poor soul whose mind at the critical moment refused to function. She said, "Gosh! I don't know anything" as was given credit with an original "line". (The writer offered to sing, but two or three offered to pay a dime to keep her quiet.)

The town of Bruce, years ago, before the advent of the railway, was known as Hurry. Some of the spirit of the old name still lingers. Now H's Majesty's Bruce Mail registers Speed. Until recently the mail travelled from post office to train in a one-wheeled car with two handles behind. Now a two-wheeled push cart, gaily painted red, with two speeds forward and one reverse, that meets the train, is an evidence of progress. When not being used by the mail-man the "Bruce Jitney" serves as town perambulator, having a capacity of six fat babies or ten thin ones.

Main Street

Mr. C. Wilbraham and family motored to Calgary last week end.

The Irma ladies Aid met at the home of Mrs. E. Simmons, Thursday afternoon.

Mrs. P. J. Hardy and Mrs. Greenberg, motored to Vegreville the first of the week.

Mrs. L. Knudson was in Calgary the first of the week, when Ina Matheson returned with her to spend her vacation.

Mrs. N. Seton and her niece Miss Norma McConnachie, of Edmonton, are visiting friends in the Irma district.

Miss M. Smallwood left Thursday of last week to resume her duties at the Royal Alexandra hospital after spending her vacation with her family south of Irma.

Mr. E. W. Carter has accepted a position with the Fuller Brush people and is now in Edmonton for instructions after which he will be stationed in the Wainwright and Chauvin district.

The Rev. J. R. Geeson was a visitor in Holden on Tuesday last to take part in the induction of the new minister of the United Church there. The Rev. H. Bosomworth, M.A., was formerly minister at Wainwright.

Some very hot discussion took place at the special meeting of the ratepayers of the Irma School district Monday night when the meeting ended by the board re-engaging Mrs. McDowell and Miss Stewart the former teachers.

Roadwork is progressing nicely in almost all parts of the Irma district. We understand that the Irma department of Public Works intends having one of the road gangs fix up the Village streets, some of them are almost impassable at the present time.

After a visit of seven weeks, Mr. H. P. Froud who has been visiting his sister, Mrs. A. C. Charter, left Irma on Thursday of last week for Portsmouth, England. He is going part way through the lakes and stopping at Toronto to visit friends before sailing on July 2nd. He very much appreciated the friendship that was offered him during his stay at Irma.

Here and There

Pictou lobster fishermen are trying a new venture in shipping lobsters to Boston, Mass. Recently a carload valued at \$4,000 went through by express over Dominion Atlantic Railway lines to Yarmouth, being shipped thence to Boston.

Lovers of wild life will be glad to hear of the establishment of a second Bird Sanctuary in Canada, similar to that of Jack Miner, to be situated at Bird Haven Farm, by John W. Piggott, of Bridgetown, Nova Scotia. It will be located in the heart of the beautiful Annapolis Valley.

The first radio broadcast in history of musical entertainment from a steamship in motion, sent over a network of Canadian and United States land stations, was carried through successfully as the Empress of Britain was sailing up the St. Lawrence on her maiden voyage from Cherbourg June 1.

All records for the St. Lawrence route to Europe were shattered when the new Canadian Pacific liner Empress of Britain, 42,500-ton flagship of the company's Atlantic fleet, made the run from Cherbourg to Father Point in four days, nineteen hours, on her maiden voyage May 27-June 1.

"The train ride from Vancouver to Banff is the most wonderful I have ever taken," was the comment of the much-travelled and famous writer J. B. Priestley, of "Angel Pavement" and "The Good Companions" fame, interviewed recently at the Banff Springs Hotel. "These parts are too wonderful to describe," he said, and added he was coming again in September for the trail riding.

The Shield for efficiency among the four Canadian Pacific white Empresses of the Pacific, donated last year by E. W. Beatty, chairman and president of the company, was presented for the second time at Vancouver recently to Captain A. J. Hosken and the ship's company of the Empress of Russia. During the presentation the gathering was entertained by the broadcast from the Empress of Britain, over 3,000 miles away, steaming down the St. Lawrence.

Definite promise of an international travelling Art School with headquarters to be established at Banff in 1932, or at one of the Bungalow Camps in the Rockies, has been given by Tom Hall, prominent London, England, artist who has been assisted by a number of his conferees in England that they would join him in artistic exploitation of the scenic wealth of the Canadian Rockies.

RESTAURANTS ON WHEELS

Strange as it may seem, good housekeeping is one of the prime essentials of modern railroading. Mr. Traveller has become so used to strolling through the train to the dining car, for his needs in the way of food for himself, as well as for Mrs. Traveller and all the little Travellers, that he hardly gives a thought to how he gets a first class hotel meal, while whirling along at 60 miles an hour. The answer lies with about 1,200 highly trained employees of the Canadian Pacific Railway, serving in some 150 dining and cafe cars, from Atlantic to Pacific, and with an organization in stores and farms throughout the country, which places high class foodstuffs in the chefs' cupboards and refrigerators. The average number of meals served in a year is approximately 2,000,000. As to quantities, suffice to say that these include nearly 500,000 lbs. of various meats; 1,000,000 lbs. of tea and coffee and some 400,000 cups of milk and cream. The Pictures show meals being served in a typical C.P.R. train and types of the staff of chefs and waiters employed in the service.

Summer Travel on the Great Lakes

The Canadian Pacific Railway announces that the company's three passenger ships, plying the Great Lakes from Port McNicoll to Fort William, will commence their summer sailing schedules on May 4 from Owen Sound and from Port McNicoll and Fort William on May 23. Thereafter, there will be three sailings weekly, one from Owen Sound to Fort William on Mondays, returning Thursdays and two each Port McNicoll to Fort William Wednesdays and Saturdays and eastbound Fort William to Port McNicoll same days. The announcement opens an alluring vista of attractive trips for the tourist who wishes to combine beauty of scenery with cool travelling under luxurious conditions in the sweltering summer days that are now approaching. These vessels, S.S. Assiniboia, Kewatin and Manitoba, are well appointed boats offering every comfort to travellers and their route is through the Georgian Bay, Lake Huron, the Sault Ste. Marie locks where there is a rise of about 20 feet to Lake Superior which they traverse, and up that vast inland sea to Fort William. The passenger travels about 600 miles, spending 39 hours on the waters of these lakes, often out of sight of land, and getting the beneficial effects of an ocean voyage. Dancing, plenty of space, strolls along promenade decks, cozy cabins, well-appointed dining-salons, glimpses of ever-changing and beautiful scenes, fit every taste and combine to make up a trip that will linger long in the memory. Travellers who are thinking of a journey across the continent from east to west, or vice-versa will find the trip on the Great Lakes makes a most welcome change in the monotony of rail travel. Lay-out shows Canadian Pacific ship ready to sail from Port McNicoll with passenger train alongside, and passing Thunder Cape, impressive beauty spot on Lake Superior.
